

## Building a leading automation journey

Working with you to kickstart your intelligent automation journey using digital process automation

### Kickstart your journey with our rapid innovation workshop

Our 10-day automation discovery workshop includes a getting started workshop consisting of process assessment with our Rapid Assessment Method to reduce pipeline effort build, we will also facilitate an interactive session focusing on RAM to apply this method to business areas. Processes will be categorized according to suitability with attendees ranking processes through this collaborative process. Finally, we will cover our automation delivery methodology Platform for Success, focusing on the immediate next steps to kick off the action plan for the highest priority processes. The remainder of the 10 days will be the development of a mock process using high-level tools.

### Our Approach

At VKY we will help your organisation become more productive, more accurate, more scalable and more cost efficient with our automation consulting service is designed to provide your organisation with automation experts at each stage of the automation journey from governance, operating/support model and methodology through to Azure hosting, automation development and analytics. We will also collaborate with your internal resources to help your organisation build a world leading automation capability, avoiding pitfalls along the way.
