

DATA SHEET

Multi-Enterprise Product & Supply Chain Platform

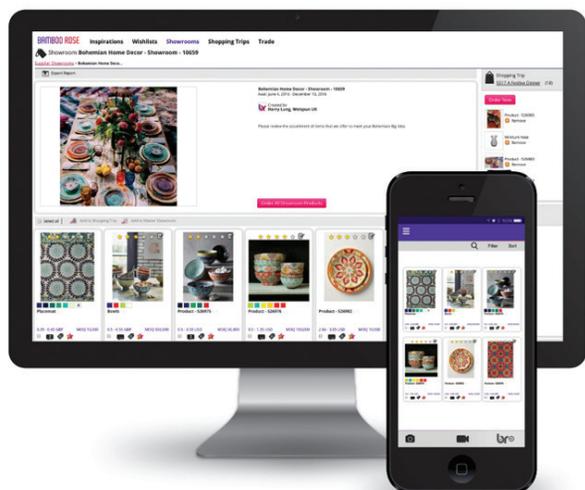

The Bamboo Rose multi-enterprise product and supply chain platform unites every partner across the supply chain through a single, cloud-based network, allowing seamless, simultaneous communication in real time.

Work together with the global retail community to bring your products to market faster.

End-to-End Innovation for Global Supply Chain

By combining all operations of supply chain management under a centralized hub, the Bamboo Rose multi-enterprise platform allows for complete, 360° visibility throughout the product lifecycle. Starting with our patented B2B Marketplace solution, connect with thousands of suppliers and retailers across the globe to spark creativity and source innovative products. Then track items across the supply chain using our suite of solutions, including Product Lifecycle Management (PLM), Purchase Order Management, Global Trade Management, and Financing.

Multi-Enterprise Platform Benefits

- One platform for all partners involved in product design, development, and delivery
- Most scalable and secure solution for high volume transactions
- End-to-end capabilities for all product design and supply chain management
- Content and business services for financing, inspection, freight forwarding, and transportation
- Real-time visibility, dynamic costing, and trade risk mitigation

Meet the Product and Supply Chain Community

Multi-Enterprise Platform Solutions

B2B MARKETPLACE

Our collaborative network solution helps retailers and suppliers get products to market up to 60 days faster. Create and share visual storyboards with team members, join forces with suppliers for creative input, shop virtual showrooms, and reduce sampling costs.

PRODUCT LIFECYCLE MANAGEMENT

Bamboo Rose PLM is a single solution for design, development, and testing of both private label and branded merchandise. Blending superior visual communication with standardized design elements, our automated PLM can reduce sampling costs and decrease cycle times by up to 50 percent.

GLOBAL SOURCING

Unify the global sourcing process and collaborate with retailers and suppliers on a single platform. Source across channels, initiate quotes, analyze costs, compare bids, share information, complete negotiations, confirm factory capacity, manage consumption, and track production without the need for third-party solutions.

ORDER MANAGEMENT

As the centralized source of record for all sales and purchase order operations, this solution integrates seamlessly with your existing ERP system, uniting domestic and import orders on a single platform. Automate sales orders to accelerate multi-channel growth and take weeks out of the order placement process.

GLOBAL TRADE MANAGEMENT

Give all parties across the supply chain a single, unified view of financials, logistics, and compliance information as it pertains to order purchases. With deep regulatory and country-specific automation already embedded into the platform, users can manage processes faster and mitigate compliance risk.

SUPPLIER FINANCING

Supplier Financing by Bamboo Rose offers quick, low-cost financing to companies using the Bamboo Rose platform via invoiceXel. Receive early payment on invoices to help meet new orders and facilitate large purchases for inventory, equipment, and staff hires.
