

Cobalt Membership Dynamics Portal Trial

Welcome to Cobalt's Membership Dynamics Portal Preview! On this site you'll get a preview of Cobalt's Membership Dynamics product and the customer facing components we call Web Elements. We hope you like what you see :)

Membership Management

Membership Dynamics can accommodate any number and combination of member types and subtypes; offer unlimited query-based billing periods, fees, and dues renewal options; streamline your applications process; and customize and automate renewal notices and invoices.

Meetings and Events

Manage meetings of all sizes — from massive trade shows to receptions. Features include customizable registration forms; one-click access to event registration; varied pricing for different customer segments; waitlist with auto updates; group registrations with a single transaction; and registration cancellation with date-driven fees.

E-Commerce and Payments

E-commerce functionality is tied to our meeting, education, and subscription modules. You'll be able to process credit card payments and refunds in real time, both from the CRM and the customer portal; manage tax and shipping; schedule payments; set up a complete online store; and complete bulk processing of payments.

All the content on the preview portal was created using Wordpress Content Management System (CMS) and Cobalt's Web Elements. Cobalt's Web Elements are a CMS agnostic Dynamics 365 portal solution that allows you to surface data and e-commerce processes directly on your website. Cobalt's Web Elements are responsive just like your website which means anything you see will render beautifully on any device. Go ahead and give it a try.

To get started click the Login and Account Setup Menu Item.

The Cobalt Membership Dynamics Portal is a Content Management System (CMS) agnostic portal solution that allows you to embed portal elements (Cobalt Web Elements) into any CMS for a seamless integration with your existing website. Rather than forcing customers to migrate to a new CMS or maintain separate Portals and Web Sites, Cobalt's Web Element Portals allow you to add Dynamics 365 Portal functionality to your existing site. To get started click the 'Get Started' button to set up a new account or enter your credentials to Login.

Login and Account Setup

You are here: [Home](#) > [Login and Account Setup](#)

Cobalt's Membership Dynamics ensures the integrity of the data created by portal users in Dynamics 365. From this page you can enter your email and the portal will verify if a contact in the system already exists with the same email address. If it does the user will be asked if they want to reset their password which will send a secure email to the address entered. If the email address doesn't exist in the system the user will be prompted to setup a new account ensuring users cannot register duplicate accounts and maintaining the integrity of the data in Dynamics 365.

E-mail

Cobalt's Membership Dynamics ensures the integrity of the data created by portal users in Dynamics 365. From this page you can enter your email and the portal will verify if a contact in the system already exists with the same email address. If it does the user will be asked if they want to reset their password which will send a secure email to the address entered. If the email address doesn't exist in the system, the user will be prompted to setup a new account ensuring users cannot register duplicate accounts and maintaining the integrity of the data in Dynamics 365.

Login and Account Setup

You are here: [Home](#) > [Login and Account Setup](#)

Cobalt's Membership Dynamics profile setup is fully configurable to collect as much or as little information from a user during the account setup process. However, there are a few pieces of information that are required for any user that is registering for a new account. On this page we will collect the minimum amount of demographic and credential information required to create a new contact record in Dynamics 365.

Cobalt's Membership Dynamics profile setup is fully configurable to collect as much or as little information from a user during the account setup process. On these pages you can ask for additional contact information to fill out a user's profile and provide more information for your organization to engage with your members. Don't want the profile setup process to be too lengthy? You can configure Membership Dynamics to only collect the minimum amount of information necessary and ask users for this information once they are registered.

Home [optional] <input type="text" value="United States"/> <input type="text" value="555-555-5555"/>	Business [optional] <input type="text" value="United States"/> <input type="text"/>
Cell [optional] <input type="text" value="United States"/> <input type="text"/>

Cobalt Web Elements Webinar
Saturday, December 2, 2017 (8:00 AM to 10:00 AM)
Cobalt has developed a robust portal solution that leverages our web element technology allowing you to embed dynamic elements that push and pull data from Dynamics 365/CRM inside of your existing web site.

Calendar

Order History

This is your member dashboard. This page will update you with the latest information regarding their membership. Pro Tip: Since this page is protected you'll see the login and account setup page if you aren't logged in yet.

The Membership Dynamics Preview portal contains just a few of the out-of-the-box elements available for Dynamics 365. In this preview portal you'll be able to test drive the customer facing Membership and Meetings functionality including integrated e-commerce. You can always get back to this page clicking the Member Profile menu item in the top navigation.

After you've setup an account you'll want to apply for membership to begin receiving the benefits of membership immediately on the Membership Dynamics portal. Including discounted event registration after successfully completing the membership application process and paying your membership fee. Click the Apply for Membership menu item from the top navigation.

Below is a list of Member Types for which your user is eligible. Pick your member type to begin and then answer a few questions regarding your membership application.

Apply for Membership

You are here: [Home](#) > [Apply for Membership](#)

Membership Dynamics includes a module called forms. The forms module allows an organization to configure their own questions and portal forms to ask users for any relevant information when a user interacts with the portal. The questions you see below are just a sample of the type of information you can collect when a user applies for membership, signs up for a meeting or when the time comes to renew. The flexibility of the forms module gives you complete control over the type of data you collect in Dynamics 365 whether it be marketing data or data pertinent to the application or registration process in order to qualify users eligibility. You have full control over the type of question as well as the required or format validation and text to display all from Membership Dynamics staff interface.

Ready to pay? Good news you don't have to enter your actual Credit Card Information into the Preview Portal! ;) While Cobalt has available integrations with all major credit card processing services, the preview portal is using a sample payment processor. To process a sample credit card do the following.

1. Choose Visa as your Card Type
2. Enter the following test credit card number (4111111111111111)
3. Enter (123) for the Security Code
4. Enter any future date for the Expiration Date.
5. Fill out the remaining fields and click Continue to preview your order before submitting payment.

Card Type	Security Code (CW/CW2)
<input type="text"/>	<input type="text"/>
Card Number	First Name
<input type="text"/>	<input type="text"/>
Expiration Date (MM/YYYY)	Last Name
<input type="text"/>	<input type="text"/>

While Cobalt has available integrations with all major credit card processing services, the preview portal is using a sample payment processor. To process a sample credit card, do the following.

1. Choose Visa as your Card Type

3. Enter (123) for the Security Code
4. Enter any future date for the Expiration Date.
5. Fill out the remaining fields and click Continue to preview your order before submitting payment.

After entering your payment information you're ready to submit your membership application. Users can review their payment information and the amount to be charged prior to processing their payment and submitting the application. Cobalt's Membership Dynamics has a robust requirements engine which once an application is submitted will automatically verify a potential members eligibility as well as flag applications for manual audit and/or generate notifications to your staff to review an application prior to granting membership. The preview portal only requires payment and a completed application for membership so once you submit from this screen you will be a member.

Apply for Membership

You are here: [Home](#) > [Apply for Membership](#)

Congratulations! You've successfully submitted your Membership Application. Below is a receipt of your application and payment which can also be e-mailed automatically to the e-mail address on file for the member logged in to the portal. This feature is disabled in the preview environment so as not to clutter user's inboxes with sample data. Now that you are officially a member head over to the Meetings and Webinars section of the portal to register for an event at the member discounted rate.

That's it. You've successfully submitted your Membership Application. Below is a receipt of your application and payment which can also be e-mailed automatically to the e-mail address on file for the member logged in to the portal. This feature is disabled in the preview environment so as not to clutter user's inboxes with sample data. Now that you are officially a member head over to the Meetings and Webinars section of the portal to register for an event at the member discounted rate. Click on the Event Calendar to view a calendar of upcoming events and meetings.

The event calendar allows you to publish events related to your organization. You can add office closings, holidays and other events that don't require an RSVP and you can publish all upcoming meetings, conferences, webinars or classes your membership organization is hosting. Click on one of the dates below to view the event details.

Otherwise you can go straight to the list of upcoming meetings and webinars by clicking on the Meetings and Webinars menu item.

Upcoming Meetings and Webinars

You are here: [Home](#) > [Upcoming Meetings and Webinars](#)

Below is a list of upcoming meetings and webinars configured in Membership Dynamics. Users can search for a specific event they are interested in attending and get started registering for the event from this page. If you're logged in you'll see options for One-Click registration for events that don't require the user to provide payment or additional information and this page will also display invite only meetings if you are hosting an event for a select group of individuals. Click on the Details to view specifics of an event.
