Well-Architected Framework

nubeGo reviews your workload status to draw a comparison against the latest Azure architectural best practices.

Security
Protecting applications and data from threats.

Operational Excellence
Operations processes that keep a system running in production.

Performance Efficiency
The ability of a system to adapt to changes in load.

Cost Optimization
Managing costs to maximize the value delivered.

Reliability
The ability of a system to recover from failures and continue to function.

An overview of the Well-Architected Review process

The review is based on Azure Well-Architected Framework.

Our clients answer a series of questions about their workload. nubeGo analyses the information and generates the report proposing improvements based on the 5 pillars of Well-Architected Framework; Security, Operational Excellence, Performance Efficiency, Cost Optimization and Reliability.

Finally, the client has the possibility of solving the findings with nubeGo´s support.

Initial Discovery → 2-hour Review → Build Report → Fix issues with us!

Consulting

- Our consultancy allows you to understand if a specific architecture aligns well with your business and with cloud best practices.

- We provide a consistent approach to evaluating systems against the qualities you expect from modern cloud-based environments and remediation that would be required to achieve those qualities.

- As we continue to evolve, we continue to learn more from working with our customers and we will inspect and adapt our recommendations.

Deliverables

- The Azure Well-Architected Review gives you access to knowledge and best practices used by Azure architects, whenever you need it.

- The tool delivers an action plan with step-by-step guidance on how to build better workloads for the cloud.

- We provide options for the implementation of tools, review of usage, recommendation on best practice, consolidation and optimisation.

- On completion of the review, we provide a report detailing any optimisation recommendations identified. As an Azure Cloud Platform Partner, we can also help you to implement remediations.
