Our Solutions

FINSERV

Real time **loan origination** and ~30% reduction in Bad Debt by giving real time loan

Increase in compliance requirements related to KYC has resulted in steep increase in staffing.

Use IN-D for real-time document verification during onboarding and an AI-enabled underwriting to reduce bad debts by 20-40% or post disbursement, identify loans with higher delinquency risk

INSURANCE

Reduce cost and delays with **real-time customer onboarding and claims processing**

IN-D is helping insurance companies transform Health Insurance claims. IN-D can read discharge summaries, medical bills coming in from various hospitals irrespective of their templates to identify the illness, trigger respective workflows and digitize medical bills doing hours of work in Seconds

ACCOUNTS PAYABLE

Achieve **Zero Touch Accounts Payable** through automated invoice processing

Improve productivity by reducing thousands of staff working in Finance & Accounting operations worldwide.

Use IN-D to read invoices for Accounts Payables automation & integration to ERP.

IN-D has been trained on a large sample set of invoices making it completely template independent and highly accurate

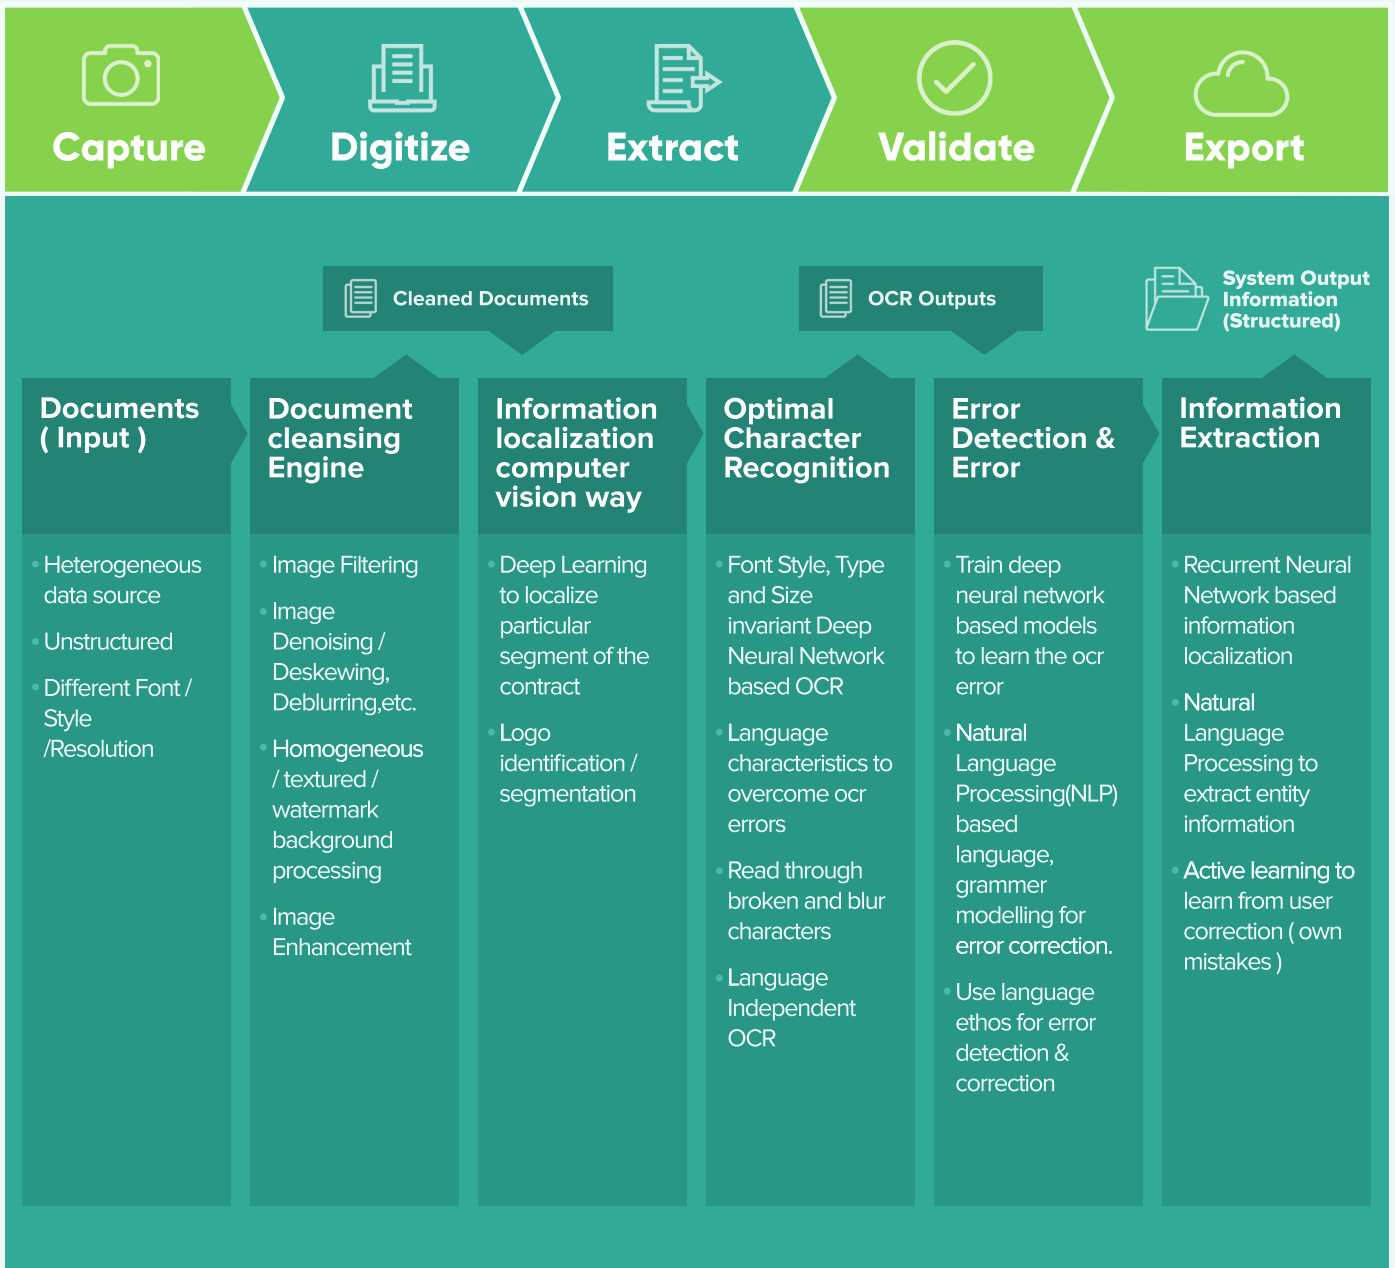

HR

Reduce cost and delays with **real-time staff onboarding** for temp and contract staff

Industries with high number of temp and contract staff spend lot of time and cost on onboarding them – forms, identify proofs, experience letters, education certificates etc. – just zip upload and IN-D completes the employee identity verification & processes other records for onboarding. IN-D saves 30-50% of time and efforts.

How IN-D works

IN-D PLUGS IN 'INTELLIGENCE'
INTO YOUR EXISTING WORKFLOWS

About Us

IN-D is an AI Powered Digital Assistant that can automate data extraction from documents making operations faster, cheaper, & more accurate. It helps NBFCs, Fintech companies, Insurance companies, and banks in smart document processing and underwriting. IN-D also helps in the accounts payable and the HR department in processing invoices and identity documents efficiently. IN-D can be deployed independently and seamlessly integrated into the existing workflows, with zero cost implementation.
