

Azure Implementation & Migration Services

MINIMUM DISRUPTION SHIFT TO AZURE

- Move your data and complex applications to Azure with minimum disruption, cost and time.
- Deep and complex components with live workloads of individual applications are understood and migrated by Zensar's Azure Experts.

Zensar's Azure Implementation and Migration Services can help you with replacement of legacy systems or introduction of new applications. We can move entire applications from an on-premises IT center to Azure, between clouds, or move application's underlying data to a new form of the application.

Contact Zensar for a free Azure Migration Assessment!

We specialize in the Microsoft Azure Cloud Adoption Framework

- We build your Strategy
- We Plan your Migrations
- We Enable your Readiness
- We build in your Governance
- We Migrate your Data and your Applications
- We Integrate everything
- We can provide complete Managed Services Too!

Zero Disruption

Non-disruptive migrations are the key to smooth functioning of business and ongoing IT operations. Zensar ensures no disruptions while executing migration activities.

Zensar follows our client's change management processes and ensures cutover activities are performed in approved maintenance windows with zero or minimal downtime.

Fully Automated Lift and Shift Migrations

All lift and shift migrations, even if they are cross platform, are carried out through our robust migration toolset.

Zensar uses automated discovery, assessment and migration tools that help eliminate human errors and make the process predictive.

Fully functional in 4 to 6 weeks

Zensar's highly experienced and certified Azure experts help build your new Azure environment within a short span of time.

Even with a complex Azure setup, Zensar can ensure your Applications and Data will be fully functional on Azure within 4 to 6 weeks.

Zensar has your Azure Migration covered: We neutralize migration complexities through our sophisticated migration tools and methodologies.
