

THE WORLD'S MOST ACCURATE AND FLEXIBLE RECOGNITION SYSTEM.

The **Tilter Scan&Go Scale** assists shoppers at self-serve checkouts by automatically identifying and presenting a selection of produce on the user interface of the system. Shoppers do not need to manually search for the desired items in the respective systems which enables a faster checkout experience.

INSTANT RECOGNITION

Leading edge artificial intelligence and machine learning instantly identifies objects without barcodes.

CONTACTLESS

Shoppers simply scan the displayed barcode with a scan and go app to add to their cart, removing all touchpoints.

FLEXIBLE

The items can be bagged or unbagged, the system identifies objects through packaging and can detect types of bags.
