

# Stay up-to-date with Cloud Hub

## About atwork

We develop business solutions based on technologies as Microsoft 365 and Microsoft Azure. We are specialized in consulting and developing a line of business apps, cloud computing workloads, and web solutions. As Microsoft Gold Certified Partner, we can offer our customers services and products at the highest level since 1999.

### See what customers are saying:

*"Cloud Hub provides us with most relevant Microsoft updates in a professional and secure way. It's an easy-to-use solution, especially for our admins."*

- Henry J.

## What we offer

We offer the Cloud Hub application in the Microsoft Teams App Store.

The Cloud Hub is a business app that allows users without an administrative role in their Microsoft 365 tenant to keep track of upcoming changes, including new and changed features, planned maintenance, and other important announcements from the Microsoft 365 Message Center and the Microsoft Azure platform including the status of the services and more cloud insights.

Interested users and administrators can add the Cloud Hub app to their MS Teams environment.

The app supports search, bookmarks, archiving, exporting, and message-sharing. Cloud Hub is currently supported in English.

Get it now and gain a unified user experience on one platform (MS Teams) and display all Microsoft messages in a table format with Cloud Hub.

Furthermore, show latest announcements at the top of the list, including features, such as search, archive, bookmark, export, and sharing.
