

IoT Sense

Smart, Scalable and Secure IoT platform

OVERVIEW

An edge level software gateway product, the IoT Sense is an intelligent H/W agnostic platform. Built on an open API arch, it helps connect your legacy & new sensors with the ease of customisation and rapid deployment

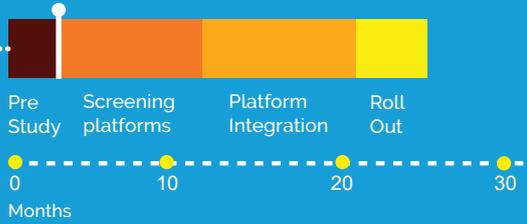

Why IoT Sense?

Make-decision

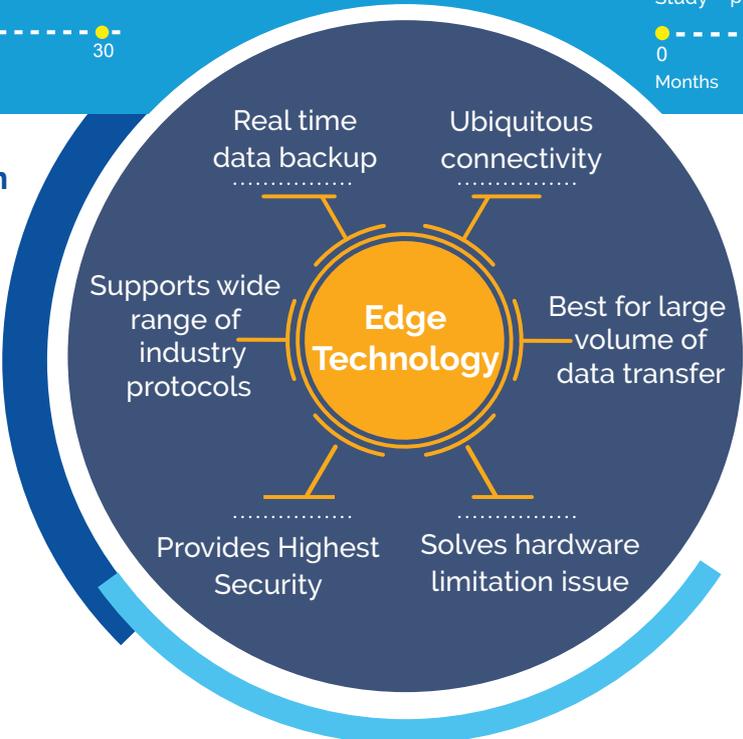

Build Vs Buy

Buy-decision

Unified Data Distribution

- Custom programmable functions
- Clean Data
- Transform Data
- Drag-n-drop UI for ease of use
- Real time data conversion

Horizontal Platform

- Facilitates focused product creation and delivery
- Enables interoperability
- Easy data collection & sharing
- Seamless device management
- Open functionality
