

# Windows Virtual Desktop on Azure: 4-Weeks PoC

**\$ Price – 5500 USD**

A long-term Microsoft Gold partner and CSP Tier-1 for the EU and CIS, Infopulse will help your enterprise to achieve strategic digital transformation goals with Azure WVD configuration, migration, and deployment of your RDS/VDI infrastructure to Azure.

With proven expertise in managed services and cloud solutions, Infopulse can guide companies in transforming their business with Azure Windows Virtual Desktop (WVD). Our experts help companies modernize their environments and migrate to Azure WVD. We also deliver this service from scratch (Greenfield deployment).

## THE PROJECT AGENDA WILL INCLUDE THE FOLLOWING KEY STEPS:

- 1 Planning an infrastructure project and its processing to ensure successful migration (up to 25 VMs).
- 2 Implementing a PoC to find the real requirements for the sizing of the future WVD infrastructure in Azure.
- 3 Creating PoC architecture of the WVD infrastructure in Azure.
- 4 Conducting migration to the WVD infrastructure. Alternatively, we can support and guide the migration performed by your in-house experts.
- 5 Recommendations based on the results of the PoC.

## To succeed in customers' VDI/WVD transformation, we provide the following services:

- Deploying the WVD infrastructure in Azure from scratch (Greenfield)
- Migrating on-premises RDS/VDI infrastructure to Azure 'as is'
- Migrating on-premises RDS/VDI infrastructure with a transition to WVD in Azure infrastructure

## Core tools, solutions, and services to be used in the PoC project:

Azure WVD service (latest version)

Azure Cloud subscription

ASR and other native Azure tools
