

Managed Azure Landing Zone

KCOM Managed Azure Landing Zone

KCOM's Managed Azure Landing Zone is a ready to deploy, Azure environment, to host your cloud services.

We deploy, manage and support the Azure landing zone along with a range of Azure services available for deployment to the landing zone.

- We provide a secure cloud platform to host your cloud services We apply a templated approach for rapid provisioning of the landing zone and cloud services
- Creates a seamless/hybrid environment between on-prem and cloud
- Deploy new or migrate existing services
- We manage the environment so that you can focus on your business applications
- Range of cloud services available so you can harness the performance, scalability and innovation of Azure
- A clear, simple, pricing model based upon your requirements and usage

Get in touch with our team to understand how our Azure Landing Zone can help accelerate your cloud adoption.

Benefits of using KCOM's Managed Azure Landing Zone:

- Get started quickly – we use a templated approach to deployment
- Benefit from a broad range of Azure IaaS and PaaS services
- Our standard landing zone can be customised if needed to meet your exact needs
- Inbuilt best practices based on KCOM's 5 pillars of Azure Best Practice
