

MICROSOFT'S UAE DATA CENTERS ARE ON THE HORIZON. ARE YOU READY TO MIGRATE?
PLAN YOUR CLOUD STRATEGY WITH LIVEROUTE

Data Center Migration requires expertise and experience; two critical elements essential in positively changing your organization's operating environment. Our Services take the risk and hassle out of upgrading to a more efficient and effective operational model.

LiveRoute's solution on Azure Data Center Migration allows your business to benefit from the following scenarios:

- Cutting costs by removing any data redundancies.
- Enhancing security by moving to a more updated system
- Increased efficiency through well planned consolidation & migration

LiveRoute commences the process by getting comprehensively acquainted with your business environment and operational needs. We then engage our exhaustive review process, so we can identify which Azure solutions suit you best, along with migration options, infrastructure prerequisites and indicative costs. Our experienced team then shares these fully documented findings with you, to initiate a comprehensive engagement that helps guide your organization through every step of the transition process.

The LiveRoute Advantage

- MOST experienced Microsoft Cloud Services Provider (Established in 2008)
- WIDEST portfolio of Microsoft Services
