Omnichannel Appointment
Scheduling Software for **enterprises**
that meet with their clients
personally

Why Online Appointment Scheduling?

- **Increase inbound lead conversion**
An award-winning website with a simple “we’ll contact you back” form, is a huge untapped conversion potential
- **Prevent loss of converted leads due to ineffective follow-up**
*Incredibly, upto 80% of inbound online converted leads are **not converted** into sales appointments*
- **Significant Productivity Savings**
Upto 50% of staff time is wasted, just managing customer appointments
- **Provide a Positive Customer Experience**
*E.g. A **top ranked aggravation** for 85% of bank customers, is getting a meeting with a bank specialist*
- **Insights into your most most important asset**
Appointment Data across the whole retail network, enabling informed management decisions

Make scheduling appointments **effortless** for your customers and **agents**.

“The power of customer-centric online appointment scheduling becomes viable only when you give agents the right tools to stay in control of their schedule.” - Skedify

The screenshot shows the Van Marcke website's appointment booking interface. At the top, there is a navigation bar with links for 'Particulier', 'Professionnel', 'Presse', 'Blog', and 'Jobs', along with a search bar and a 'Prendre rendez-vous' button. The main header features the Van Marcke logo and the text 'Tout pour l'eau et la chaleur'. Below the header, there is a navigation menu with categories like 'Salles de bains', 'Cuisines', 'Chauffage', etc. The main content area is titled 'Prenez rendez-vous' and contains a series of steps: 1. 'Quelle est la raison du rendez-vous?' with three image-based options: 'Salles de bains', 'Cuisines', and 'Chauffage et Energie renouvelable'. Steps 2 through 5 are represented by grey bars with text: '2. Où aura lieu le rendez-vous', '3. Sélectionnez une date et une heure', '4. Aidez-nous à préparer votre rendez-vous', and '5. Vos données personnelles'.

- *Manage organisation, branch and individual availability*
- *Multilingual*
- *Manage Employees, Skills and Locations*
- *Customizable Notifications; SMS and email*
- *4 user levels; Admin, Branch Manager, User and Authorised Appointment Creator*

How to make it fit within your **Application Landscape**

An online appointment system is never an isolated solution, it needs to be perfectly aligned within your existing and future Application Landscape.

That's why we built Skedify **API-First** from the ground up and can provide integrations with all relevant types of Applications. Always with security and data protection in mind.

How to make it **viable in a retail network**

- 2-way **Synchronization** with Calendar software
- Flexible **availability management for agents** when to make themselves accessible to their customers
- Extensive **planning rules** per type of appointment over different branches & meeting channels
- Allow for **tentative appointment request flows**

Enterprise level **security**
