

# Optimise your desktop virtualisation experience to leverage the power of a modern cloud

Expand capabilities with the best virtualised end-user experience

- Connect to any platform with an experience just like native
- Enhance protocol by adapting bandwidth utilisation
- Enable fast VHD load times and log-on times with containerised user profiles
- Drive stronger collaboration with Teams enhancements

Realise more efficient and simplified management

- Unify both Desktop and RemoteApp experiences for easy-to-grasp learning
- Engage flexible user experiences through a single host pool and multiple app
- Utilise automated VM deployment
- Solve errors quickly with simplified but powerful troubleshooting with advanced diagnostics

Ensure security and modernisation with a standardised, global cloud

- Reach anyone, anywhere with 54 regions (more than any other cloud provider)
- Rely on powerful cyber-defence operations with over 3,500 full time security professionals
- Assign role-based access control to admins

Significantly reduce costs without compromising quality

- Decrease spending to only virtual machines, storage and networking consumed while using the service
- Employ the full Windows 10 experience at multi-session cost
- Absorb the licences you already own to limit spending
