# Erp Gateway

- è un servizio che consente di creare un ambiente per l'analisi dati su azure a partire dal erp SAP
- è basato su componenti certificati SAP
- non sono necessarie configurazioni particolari sull'ambiente SAP
- sono disponibili moduli già preconfigurati che coprono le principali esigenze
- permette la fruizione del dato in tempi estremamente rapidi
- E' configurabile in base alle necessità

# Architettura

# certificazione SAP

## Certificate SAP INTEGRATION CERTIFICATION

SAP SE hereby confirms that the interface software for the product ERPConnect 6.5 of the company Theobald Software GmbH has been certified for integration with SAP S/4HANA based on an ICC Integration Assessment.

This certificate confirms the technical compliance of ERPConnect 6.5 with SAP certification procedures.

The certification test is documented in report no. 14190 and expires on April 11, 2022.

SAP Test System: SAP S/4HANA 1709  
Used Integration Tools: SAP NetWeaver RFC Library

### Certified Functions:

- Call generically all available RFC function modules and BAPIs
- RFC / IDOC communication in both directions (client / server)
- Call ERP Queries
- Call BW InfoProviders and Queries
- Unicode communication enabled

Christoph Claus

**SAP® Certified**  
Integration with SAP S/4HANA\*

THE BEST RUN 

SAP certification focuses on technical integration with SAP solutions. Vendor is responsible for the product itself, its error-free operation, and adherence to applicable laws.
