

# Keep Workers Safe in Hazardous Conditions

People Safety Badge and Eugenio

# Impact on People and Organizations

1.8M

Leaves of absence due to workplace accidents in Brazil 2014-2018

6,200

Worker deaths due to workplace access in Brazil, 2014-2018

35K

Decisions each day by the average adult, leading to decision fatigue

# Keep Workers Safe in Hazardous Conditions

Logicalis + Azure + IoT

Logicalis' People Safety Badge helps you keep your workers safe in hazardous locations by assigning them intelligent badges with tracking technology, vibration/lights alerts, a fall detector and a panic button. Our badges work indoors and outdoors with different wireless technologies so you can focus on worker safety and incident response.

# Improve Worker Safety and Operations

## Protect

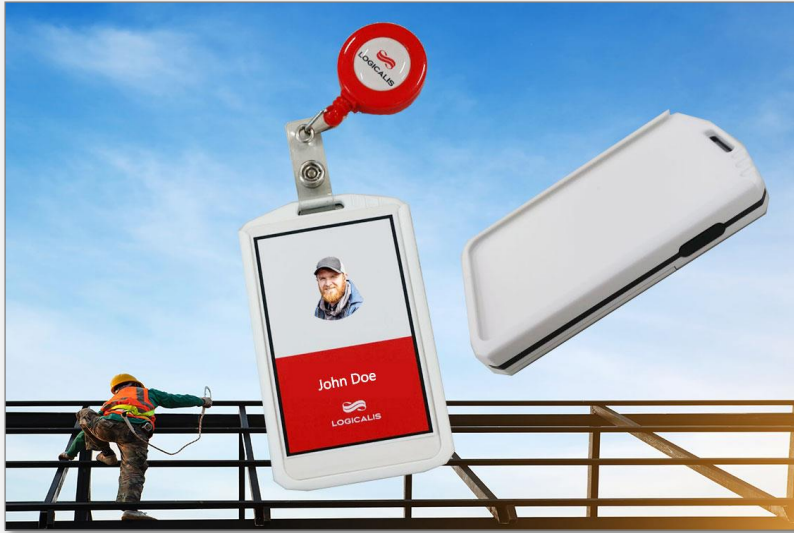

Reduce the risk of job site accidents, enhance worker safety, and improve incident response

## Improve

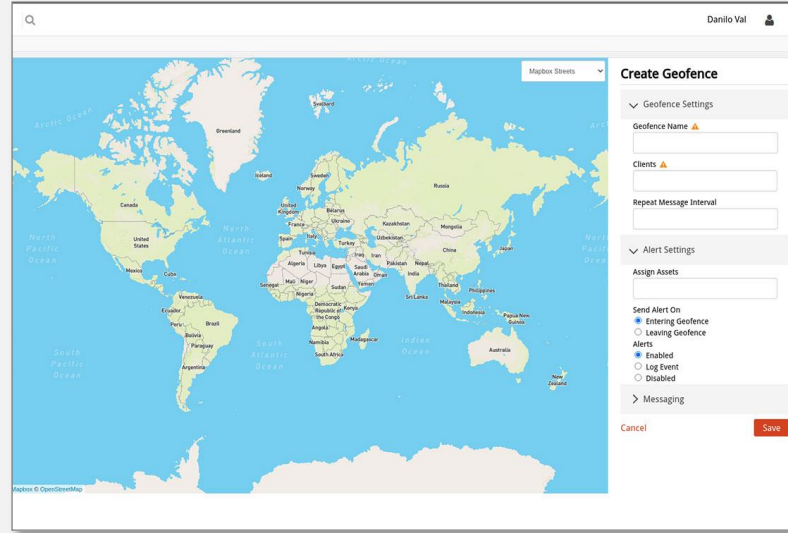

Leverage job site insights to update safety procedures and worker training to minimize incidents

## Save

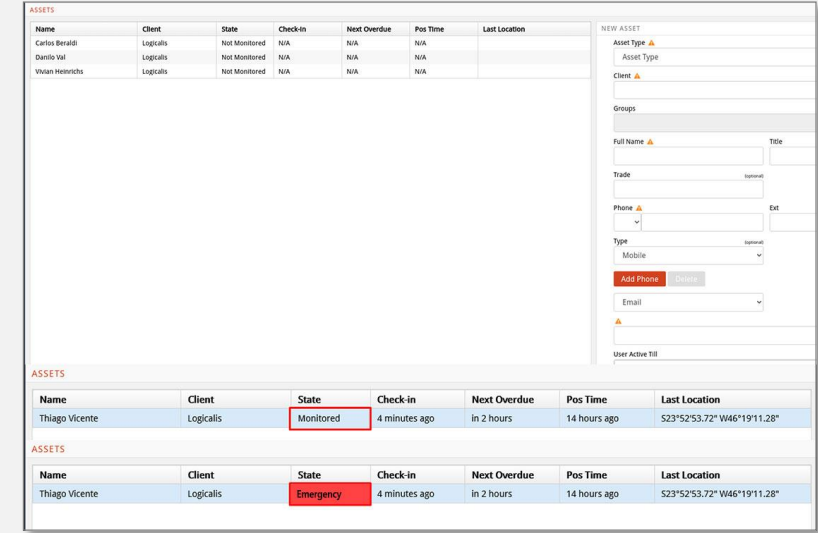

Minimize the cost and impact of safety accidents and incidents on business operations

Easy to deploy badge style form factor

Visualize workers and geofences with maps

Review safety incident alerts and respond to them

# Improve Worker Safety and Operations

# Built on Microsoft and Azure technologies

Aggregate, analyze and react in real-time

Integration to  
speed data into  
cloud

Storage to scale  
without latency

Visualization to  
surface insights

Analytics to  
predict and  
plan

Security to  
protect data
