

Move your ERP to the cloud

Many organisations are running business critical systems on their own hardware or in a data centre that they are responsible for. The most critical business system is the ERP and financial system.

Without these systems, organisations are unable to invoice their customers and keep track of their incoming and outgoing payments. If these systems are unreliable or unavailable, or the hardware is aging, it is highly detrimental to the business' success. With aging hardware and shrinking budgets, the cost of replacing hardware is high.

On average, internally managed business-critical environments are only available 85% of the time. Typically your workloads for business critical systems such as ERP are required at the beginning/end of the month. This is when your servers tend to go down.

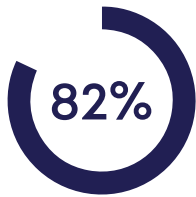

Altron Karabina is highly experienced in the ERP and financial system arena and has a solution to enable you to move from your on-premise ERP into the Azure cloud, with a specialised focus on Dynamics AX, NAV, GP, Sage, and home grown ERPs.

Why move your on-premise ERP to the Azure cloud?

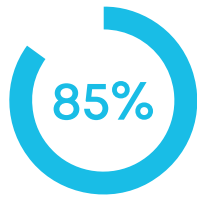

-  Lower total cost of ownership
-  Faster deployments
-  Highly secure
-  Reduced strain on internal IT resources
-  Disaster recovery and uptime is over 99%
-  Faster upgrades and updates
-  Compliant to local and global data regulations (GDPR + POPI)
-  Not constrained by purchased hardware size, performance and storage

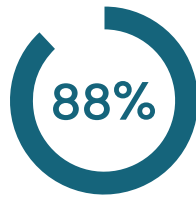

Move your ERP to the cloud

82% of businesses currently use a hybrid cloud strategy

85% of fortune 500 companies use Microsoft Azure

88% of organisations are using public cloud in some capacity

There are 120 000 new Azure customer subscriptions per month

*Statistics sourced from Microsoft Inspire, 2018, Las Vegas, NV

Altron Karabina's approach to moving your ERP workloads to the cloud

Using our experts in the field, Altron Karabina will migrate your ERP solutions into the Azure cloud, including databases, legacy applications and/or homegrown ERP systems.

1

We assist with the migration with near-zero cutover downtime

2

We assist in non-disruptive tests before cutover

3

We assist with your cloud adoption and unlock new capabilities

About Altron Karabina

Altron Karabina is a 17-year-old business focused on delivering quality data management and analytics solutions to solve your business problems. We're specialised in Microsoft solutions and are 13 times Microsoft Data Analytics Partner of the Year Award winners.

We adapt quickly to your requirements and have developed our own agile approach to prove quick time-to-value for our customers, thereby allowing them to make quicker and more accurate data-driven decisions.
