

## Azure Lift-and-Shift FastStart

Keep and run existing systems "as-is" within the Microsoft Azure Cloud

When it comes to outdated and costly on-premises infrastructure, the "lift-and-shift" approach can be a cost-saving method to take in-house apps not in immediate need of re-architecting into the cloud. By moving applications "as-is" onto Azure, organizations can take advantage of some of the benefits of cloud computing - such as increased availability and/or reduced total cost of operations.

The challenges of moving legacy, business-critical applications governed by both business and IT stakeholders can run into risks if goals, risk profiles and expected outcomes are miscommunicated or unexpected. Our Softlanding Azure Lift-and-Shift FastStart is a two-week engagement that will include a lift-and-shift workshop to define requirements and design and plan the feasibility of migrating infrastructure and/or VMs into the cloud. At the end of the workshop you will have a fully pilot-ed application up-and-running on Microsoft Azure.

### AZURE LIFT-AND-SHIFT FASTSTART | DETAILS

#### The FastStart includes:

- Infrastructure/VM discovery
- Lift/shift workshop
- Design and planning report
- Implement hybrid network
- Pilot move to Azure using Azure Site Recovery

## Softlanding's Alternative Azure FastTrack Offerings

### Azure Dev/Test

Solve the delays in creating and managing environments by moving it to Microsoft Azure. Softlanding's FastStart offering provides a tailored dev/test environment in Azure with proper governance set in place.

### Azure Application Modernization

Modernize your workforce with a proven two-week engagement set to transition your applications to Microsoft Azure.

### Azure Disaster Recovery

Achieve enterprise-grade business continuity to protect applications by coordinating the replication and recovery of physical or virtual machines within minutes.

### Azure Virtual Machine Backup

Achieve full backup and protection of Azure virtual machines and applications with a proven ten-day engagement to set up these cloud-based workloads under Azure Backup.

## ABOUT SOFTLANDING

Founded in 2000, Softlanding helps organizations be their best by providing technology solutions and services that make them more productive. Areas of specialty include end-to-end Azure services, Microsoft Enterprise Infrastructure and Managed IT Services. As a recognized leader in empowering enterprises with solutions and services built on the Microsoft Cloud and on-premises platforms, Softlanding is proud to be named winner of the Microsoft 2017 IMPACT Award for Enterprise Cloud Platform Innovation and finalist for Enterprise Cloud Productivity Innovation.
