

Preface

I'm Steve Rastall, the Managing Director of igroup, a Microsoft Gold Certified Partner, specialising in Azure and SharePoint.

igroup's journey began in 2005 with a humble investment of just £1500. Since then, we've grown the business to become a multi-site, multi-million-pound business. igroup grew over 65% in 2015 & over 30% in 2016.

igroup's success is continually driven by investing in the right people. We believe in our employees. Every person here at igroup has the same set of successful traits – nice, friendly people, who have a positive 'customer first' attitude, who will take actions to generate results, and ultimately, loves what they do each day. We like to think of it as igroup DNA.

I'm proud to say the igroup team has a vast combination of expertise representing Microsoft solutions. Over our thirteen years' of experience, we've developed a strong, structured approach to enable us to successfully deploy solutions that satisfy our customers. We take immense pride in the fact that we have such long lasting relationships with our customers.

Understanding the challenges and pain points that businesses experience within IT is what we do best.

We look forward to working with you.

A handwritten signature in orange ink that reads 'S. Rastall'.

Experts

Experts in Azure

We're Microsoft Accredited Cloud solutions specialists who help businesses move to the cloud with confidence.

We will manage your cloud infrastructure, optimise performance, ensure scalability and resilience, all with your budget in mind.

Our Azure team specialises in walking you through the digital transformation process to create a robust environment which is designed to deliver optimum performance with your budget in mind.

We've worked with companies who

- offer software as a service (SaaS) in industries such as finance and manufacturing
- provide data intelligence as a service around the globe
- design and host websites for FTSE clients
- need a temporary hosting 'stop-gap' whilst weighing up long-term plans
- have minimal internal IT resources to manage cost, maintenance, security, and performance of their cloud infrastructure

Azure is Microsoft's ever-growing collection of integrated cloud services that provide the freedom to build, manage and deploy applications.

Experts

Experts in SharePoint

We're Microsoft Accredited SharePoint specialists who build and deploy successful intranets and websites since 2007.

We specialise in application and platform development, migration services, infrastructure and app health checks, cloud hosting, support, and consultancy.

Our team have delivered SharePoint platforms for use as intranets, websites, document management and collaboration platforms, business process and workflows, and as a communication tool.

We will diagnose problems in existing deployments, as well as customise out-of-the-box systems. When companies talk to us about their proposed or existing intranet, we're completely open with our advice and provide realistic costs.

We work with clients of all sizes and sectors, providing them with reliable, expert help for all areas of SharePoint.

If you've got an idea, we'll help you bring it to life using SharePoint.

Microsoft
SharePoint

SharePoint is a mobile,
intelligent intranet that
helps you share work,
organize projects,
manage business
workflows, build apps
and manage risk.

Companies we've helped

Thoughtful Digital Transformation
