

Advancing Organisational Performance with SelfDrvn's AI & Gamification Platform

ABOUT SELFDRVN TALENT ENGAGEMENT

SelfDrvn's Talent Engagement Platform works to engage, motivate, and retain great talent. In today's world, employees thrive when given immediate and meaningful feedback – something that SelfDrvn has nailed with their world-class platform. Gamification, motivation, actionable insights, and real-time recognition are just a few of the key features that SelfDrvn brings to the modern workplace.

WHAT WE OFFER

Engage, Motivate, Retain
SelfDrvn empowers its clients to better optimise their talent through AI, gamification, Quests, and digital nudges.

With clear goals and gamification, SelfDrvn have figured out the formula to drive multi-layered motivation. A platform that serves the needs of multi-generational, modern workforces.

The power of Microsoft Teams and Azure bring the SelfDrvn platform to life. Seamless integrations enable teams to securely collaborate, consume, and perform.

Reseller Programme
Working closely with reseller partners and brands enable SelfDrvn to hold true to their mission of enabling a world where employee well-being is the key to company success.

Azure enables SelfDrvn to build trust and loyalty not only with customers, but also with reseller brands. The security, scalability, diversity, and inclusion of this world-class cloud is foundational to SelfDrvn's reach and impact.

WHAT OUR CUSTOMERS ARE SAYING

"SelfDrvn's Talent Engagement Platform helped us to create a comprehensive talent management solution, driving performance, learning, engagement and collaboration."

– Patrick Lim – Director, Nettium

Microsoft Azure

Microsoft Azure is an ever-expanding set of cloud computing services to help your organization meet its business challenges. With Azure, your business or organization has the freedom to build, manage, and deploy applications on a massive, global network using your preferred tools and frameworks.

KEY USE CASES

WEB APPLICATIONS

Build anything from lightweight websites to multi-tier cloud services that scale up as your traffic grows.

CLOUD STORAGE

Rely on geo-redundant cloud storage for backup, archiving, and disaster recovery.

BIG DATA & HPC

Get actionable insights from your data by taking advantage of a fully compatible, enterprise-ready Hadoop service.

MOBILE

Accelerate your mobile app development by using a backend hosted on Microsoft Azure.

MEDIA

Create, manage, and distribute media in the cloud – everything from encoding to content protection

WHY AZURE

FLEXIBLE APPLICATION MODEL

Microsoft Azure provides a rich set of application services, including SDKs, caching, messaging, and identity. You can write applications in .NET, PHP, Java, node.js, Python, Ruby, or using open REST protocols. This is all part of Microsoft's promise to let you build using any language, tool, or framework.

ALWAYS ON, ALWAYS HERE

Build resilient applications with automatic operating system and service updating, built-in network load balancing, and geo-redundant storage. Microsoft Azure also proudly delivers a 99.95% monthly SLA. You can rely on decades of experience in data center operations and trust that everything Microsoft Azure offers is backed by industry certifications for security and compliance.

DATA CENTER WITHOUT BOUNDARIES

Microsoft Azure makes it easy for you to integrate your on-premises IT environment with the public cloud. Migrate your virtual machines to Microsoft Azure without the need to convert them to a different format. Use the robust messaging and networking capabilities in Microsoft Azure to deliver hybrid solutions, and then manage your hybrid applications from a single console with Microsoft System Center.

GLOBAL REACH

With data centers around the globe, a massive investment in data center innovation, and a worldwide Content Delivery Network, you can build applications that provide the best experience for users, wherever they are.
