KEY CHALLENGES

Since COVID-19 began many offices and sites have closed. Organisations with on prem data centres are now relying heavily on VDI for employee remote access. This sudden pressure on VDI is causing capacity issues, especially at peak times.

1

VDI MAXED OUT

No one could have predicted, or planned for the events of the past few months. As a result, the huge volumes of employees now working from home has put an unprecedented strain on VDI solutions.

Many on prem VDI solutions are simply unable to scale quickly enough, or cheaply enough, to meet this sudden demand.

2

SUPPLY CHAIN ISSUES

Additionally, many of the world's supply chains are now disrupted. Making it simply too long and too expensive to scale VDI solutions hosted in an on prem data centre.

3

FUTURE UNKNOWN

Even if the right hardware is available, with the immediate future unknown, a CAPEX-heavy solution would be a risky move.

Rather, CIOs and tech leaders need a cloud-based, scalable VDI solution that can be dialled down, as and when employees head back to the office - or back up again - if required.

SCALE CAPACITY OVERNIGHT

THE SOLUTION: WINDOWS VIRTUAL DESKTOP **FASTSTART (WVD)**

CANCOM's FastStart service is helping organisations across different sectors, quickly and cost-effectively scale their VDI infrastructure, for 1000's of desktops in the Cloud. Available on a scalable, per user, per desktop basis, employees based remotely, or at home, can enjoy the same desktop experience as if they were in the office.

SCALABLE

Quickly shrink capacity down, and scale it back up again.

SECURE

Remote working, on any device, with no risk of data stored locally.

COST-EFFECTIVE

Run multi Windows 10 with no CAPEX investment.

EASY TO MANAGE

Centralised self-serve IT management with CANCOM's 1st/2nd/3rd line support if required.

CUSTOMER EXAMPLES

FINANCIAL SERVICES

In response to the coronavirus, a leading private equity and investment firm asked CANCOM to help them rapidly scale their remote working. Within days our Windows Desktop FastStart service provided the secure, remote access needed and a single platform for business continuity planning. Our quick deployment helped analysts and fund managers in 9 different countries closely track and monitor fluctuating markets, from home. Crucially, security and compliance features fully comply with FSI regulations.

Data stays in the Cloud | Centralised IT Management | Fully scalable

THE POLICE FORCE

We are currently helping a UK police force deploy Windows Virtual Desktop for over 2,000 users, in a matter of days. This will allow support staff to log on to desktops securely from home, with personalised settings in tact. Plus, it will also allow police officers to access Windows 10 desktop applications from any location. So, whether they are on-the-beat, in a patrol car, or even in a surveillance helicopter, (using SD-WAN, Wi-Fi or 4G connections), they will be able to securely access their personalised desktops. Many police officers use BYO devices which could pose a security risk, but because WVD data is only stored in the Cloud, the risk of sensitive data being stored locally is eliminated.

Compliant | Scalable | Cost-effective

CENTRAL GOVERNMENT

A photograph of three office workers in a modern, bright office environment. On the left, a man with dark hair and a beard, wearing a grey button-down shirt, is leaning forward and smiling while gesturing with his hand. In the center, a woman with long brown hair, wearing a white blouse, is also smiling and looking towards the man. On the right, a man with a red beard, wearing a blue polo shirt, is leaning in and smiling. The background shows office shelves and a bright, airy atmosphere.

Our Windows Virtual Desktop FastStart service recently delivered scalable, remote desktop access for a leading government agency involved in the fight against crime. Due to the highly sensitive nature of their work, not all employees can work remotely. However, using Windows Virtual Desktop combined with the right security and risk controls in place, over 70% of employees can now work securely from home, or remotely.

Data stays in the Cloud | Secure | Compliant

ABOUT US

Our complete IT solution includes: robust consultancy, innovative design, best-practice deployment plus management and support from our UK & Ireland DataCentres.

CANCOM is listed on the German Stock Exchange and is part of the CANCOM group based in Germany.
