

Managed cost and security - 2 week Assessment

As a Microsoft Gold Partner and Azure Migrate Partner, we have helped businesses manage their Microsoft Cloud environment since 2010. Our managed service combines our deep technical expertise with our world-class CloudAtlas tools to continuously control and assess of your Azure subscriptions to ensure you to stay in control of cost, security, and GRC (Governance & Regulatory Compliance).

Our Managed service ensures you to stay in control of costs, security, and GRC for Azure. Our experts use their deep cloud expertise and CloudSupervisor automated tools to monitor of all your Azure resources, configurations and settings. In just 24 hours we will provide you a detailed report on all your Azure resources, across all services and configuration settings, to ensure your applications are Secure, meet or exceed regulatory requirements, and are following Azure industry best practices.

UnifyCloud's CloudSupervisor optimizes and monitors Azure subscriptions using read-only access to APIs. Manage and control Azure resources against security standards and regulatory baselines (e.g. GDPR, ISO, SOX, and PCI). Create custom security and compliance baselines for your industry and geographic requirements.

Control Costs: Using read-only access to your subscriptions, UnifyCloud manages and controls costs of individual resources with snoozing and rightsizing recommendations, including resource optimization for VMs, SQL, and all Azure resources. Set budgets for individuals, departments, and entire organizations, and monitor and track spend across budgets.

Control Security and GRC: We will report on individual subscription owners on the cost, security, and regulatory compliance of their Azure subscriptions, with additional organizational views for Director, VP, and C-level executives. Option to delegate monitoring reports to Finance, Security and GRC SMEs.

UnifyCloud offers a managed service to optimize and monitor Azure subscriptions using read-only access to APIs. Manage and control Azure resources against security standards and regulatory baselines (e.g. GDPR, ISO, SOX, and PCI). We can also create custom security and compliance baselines for your industry and geographic requirements.

Manage costs of individual resources with snoozing and rightsizing recommendations, including resource optimization for VMs, SQL, and all Azure resources. Set budgets for individuals, departments, and entire organizations, and monitor and track spend across budgets.

Ensure individual subscription owners are accountable for cost, security, and compliance of their Azure subscriptions, with additional organizational views for Director, VP and C level executives. Delegate monitoring reports to Finance, Security, and GRC SMEs or let UnifyCloud handle all the reporting and monitoring.
