

Fast, Easy, Accurate Financial Statements

Financial Reporting Software

Create and distribute all your financial reports in seconds. FYIsoft is extremely easy to use, proven to cut reporting time by 50% or more, and pre-integrated with most GLs.

ReportFYI is specifically designed to simplify financial reporting, especially for multi-entity and fast-growing companies. ReportFYI is extremely easy to use, eliminates the manual tasks and errors associated with spreadsheets, and supports many general ledgers whether stand alone or simultaneously. Within hours we can have you up and running, ready to take advantage of these powerful features and many more.

Multi-Entity Reporting

Easy consolidation and reporting for many divisions or entities, even if they have different GLs, charts of accounts, currencies, or fiscal calendars.

Presentation-Ready Reports

Financial statements are perfectly formatted and ready for executive presentations, right out of the system, with no manual editing required.

Secure, One-Click Distribution

All reports can be scheduled in advance or sent immediately with just one click, and with complete confidence that the right people get the right reports.

Easy to Add or Change Reports

A unique "building block" approach makes FYIsoft extremely easy to learn and use, without IT assistance or coding required.

Powerful Drill-Down Capability

Authorized users are empowered to conduct their own analysis by drilling down to view transaction level details, including scanned invoices.

Flexible Report Output

In addition to secure, web-based reports, completed reports can also be easily exported in any format needed, including PDF or XLS.
