Onboarding for Intune for Mobile Devices

AgileSecurity

Delivered by **Agile IT**
We make IT easy

Who We Are

Agile IT is a Digital Transformation expert focused on Cloud Computing, Security and Software as a Service. We specialize in migrating and managing IT services for customers looking to get the most from their IT investments. We strategically partner and align with Microsoft, Amazon Web Services, Okta, VMware and more.

Speed

Time to deployment,
productivity, and
security

Transfer

Emails
Files
Collaboration
Workflows

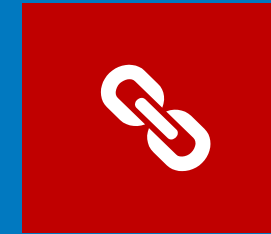

Productivity

Office 365
Azure
Amazon Web
Services

Settings

Onboarding
Deployments
Managed services

Security

Compliance
Remediation

Communication

Online
Phone

Community

Build a community of managed
customers that maximizes cloud and
SaaS services to drive their business

Security

Continuously deliver best practices and
operations for security and compliance
while maintaining customers' business
productivity and collaboration

Digital Transformation

Drive Digital Transformation through
automation, integration, and process
improvements by leveraging modern IT
practices and cloud services

Do You Have A Strategic Roadmap?

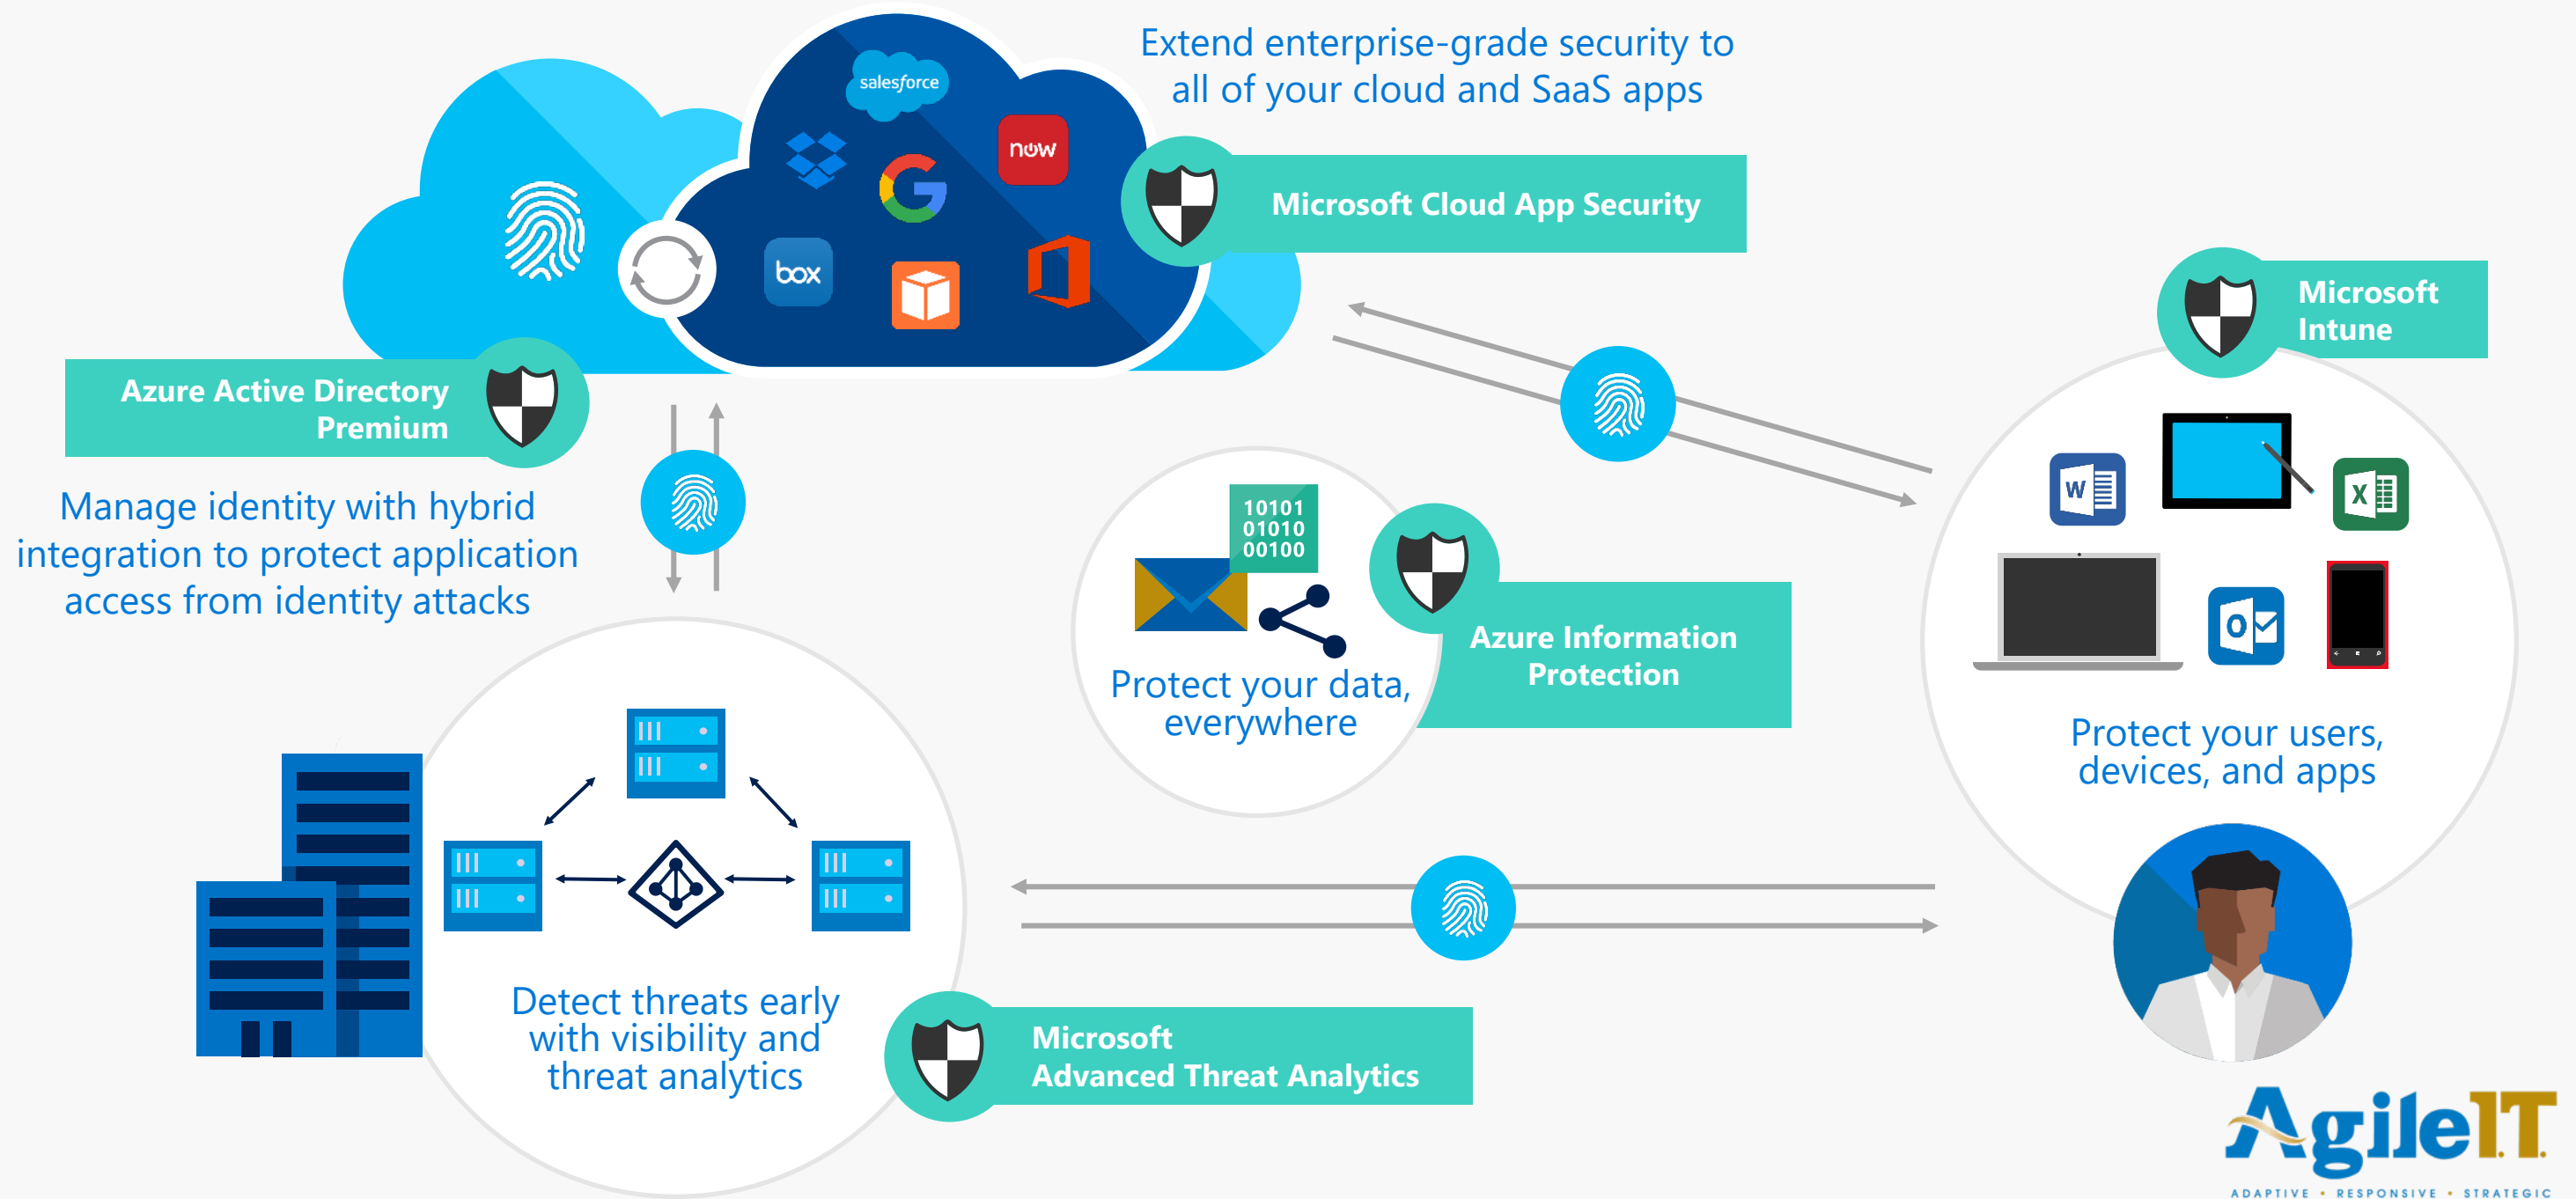

AgileSecurity Onboarding for Intune and Mobile Devices

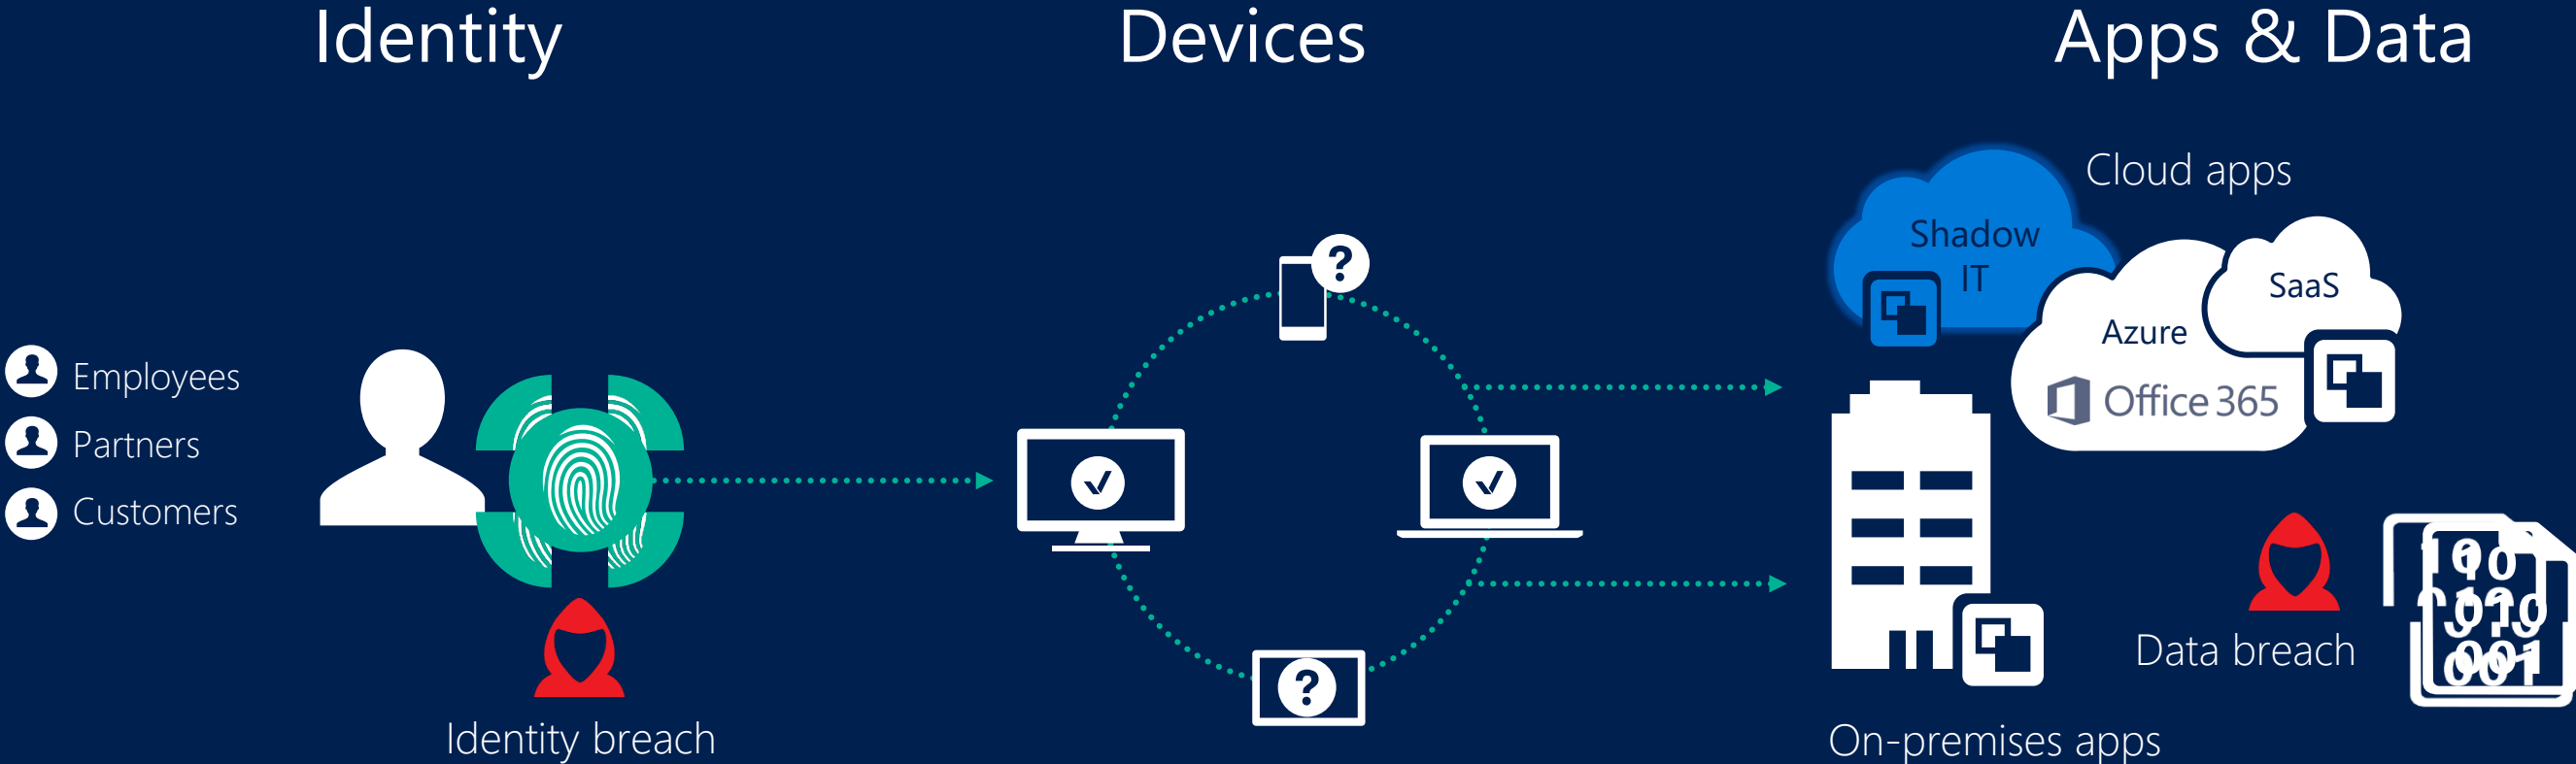

Productivity	Office 365: Mail	OneDrive Teams SharePoint	PowerBI & PowerApps Flow Dynamics 365
Infrastructure	Active Directory Azure Active Directory	Azure File Services Virtual Machines & Storage Federation Services	Data Stores & Databases Skype for Business Online Integration Services
Desktops & Devices	Office Pro Plus Office Mobile Apps	Intune MDM + MAM Advanced Threat Protection	

Agile IT's repeatable code assures strong foundations and consistent delivery.

Enterprise Mobility + Security

Security landscape has changed

Transition to
cloud & mobility

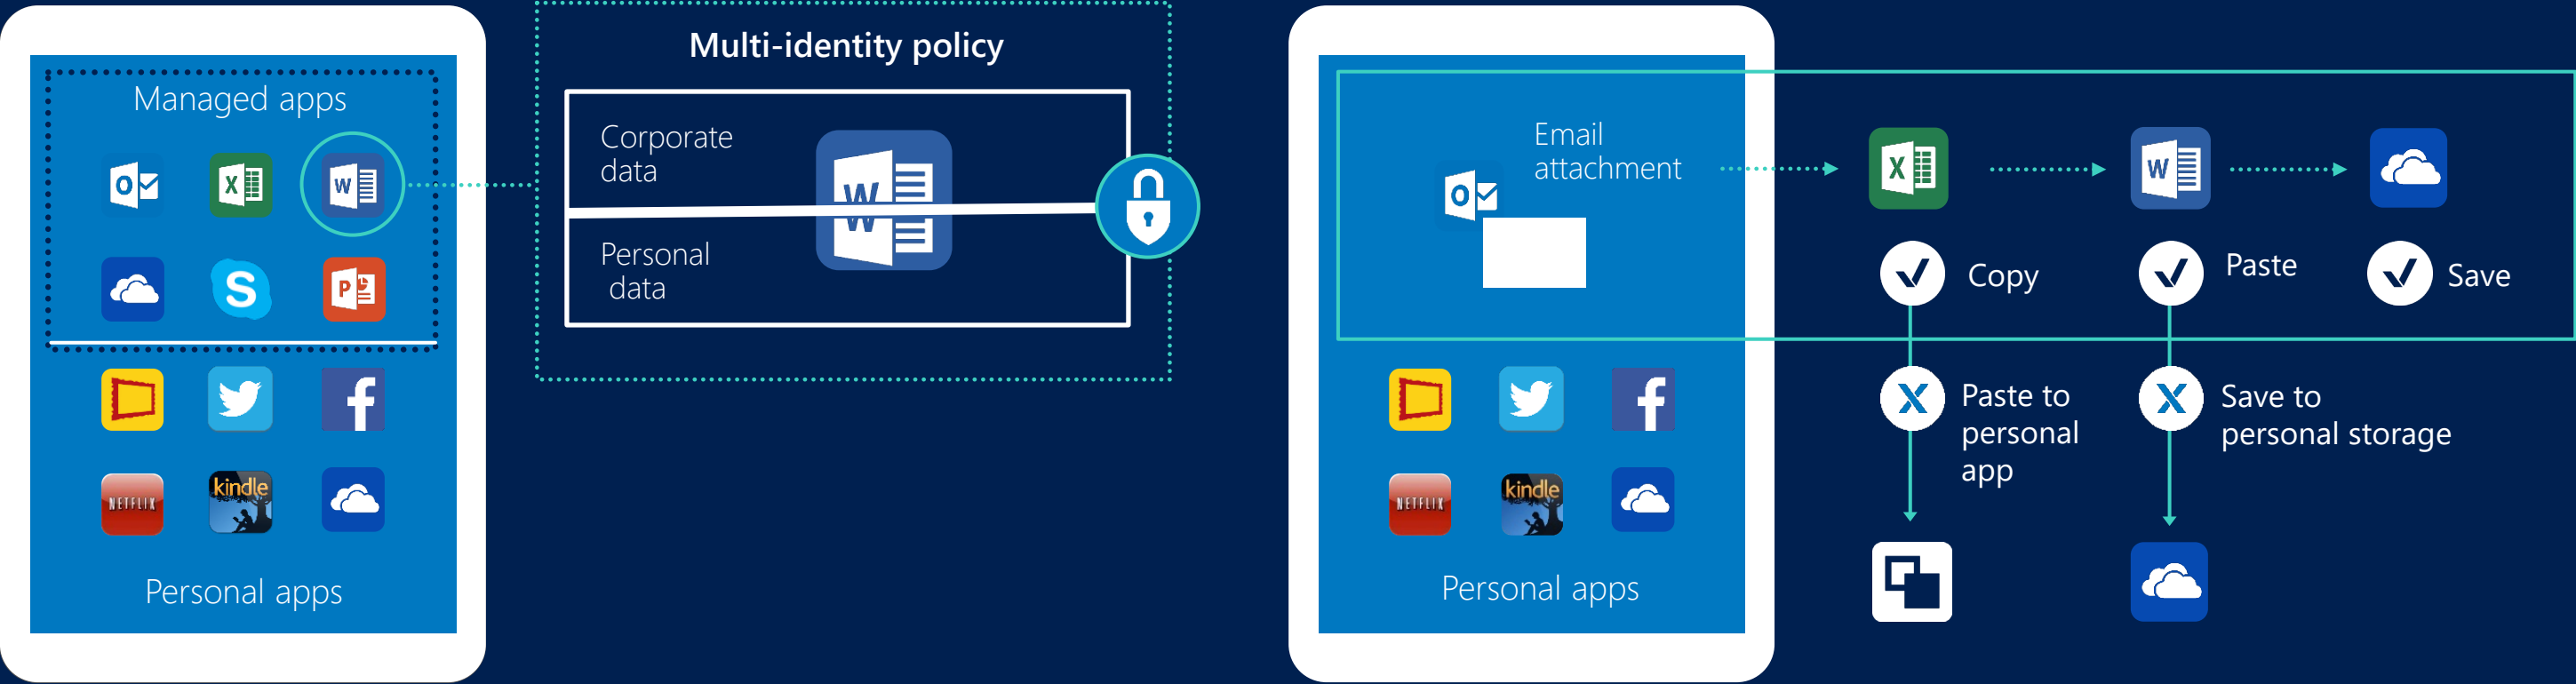

New attack
landscape

Current defenses
not sufficient

Mobile app management

Secure devices and protect data at the app level

Data control / separation

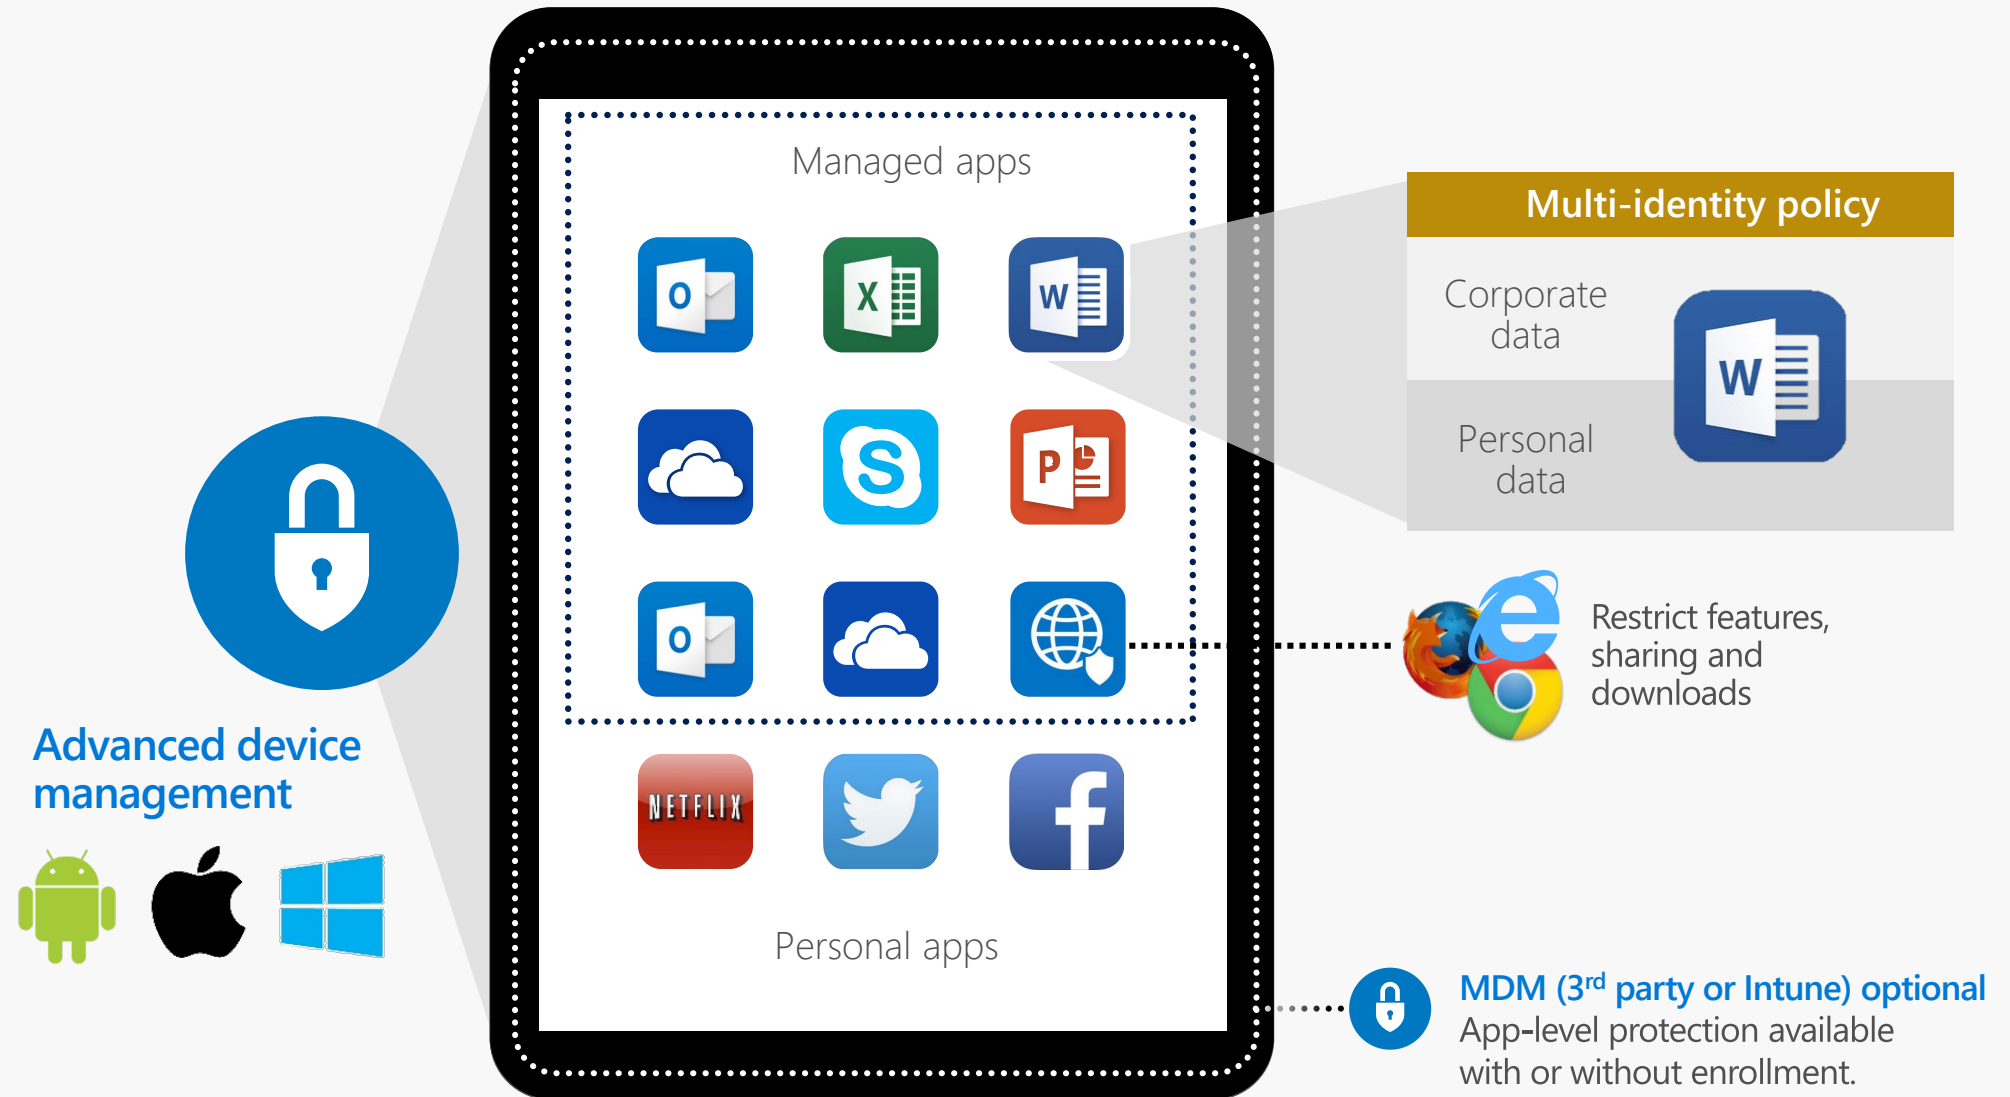

Control company data after it has been accessed, and separate it from personal data.

Device security configuration

Enforce device encryption, password/PIN requirements, jailbreak/root detection, etc.

Restrict apps and URLs

Restrict access to specific applications or URL addresses on mobile devices and PCs.

Microsoft Threat Protection with Microsoft 365

1

Identities: Validating, verifying, and protecting both user and admin accounts

2

Endpoints: protecting user devices and signals from sensors

3

User Data: evaluating email messages and documents for malicious content

4

Cloud Apps: protecting SaaS applications and their associated data stores

5

Infrastructure: protecting servers, virtual machines, databases, and networks across cloud and on-premises locations

ADAPTIVE • RESPONSIVE • STRATEGIC

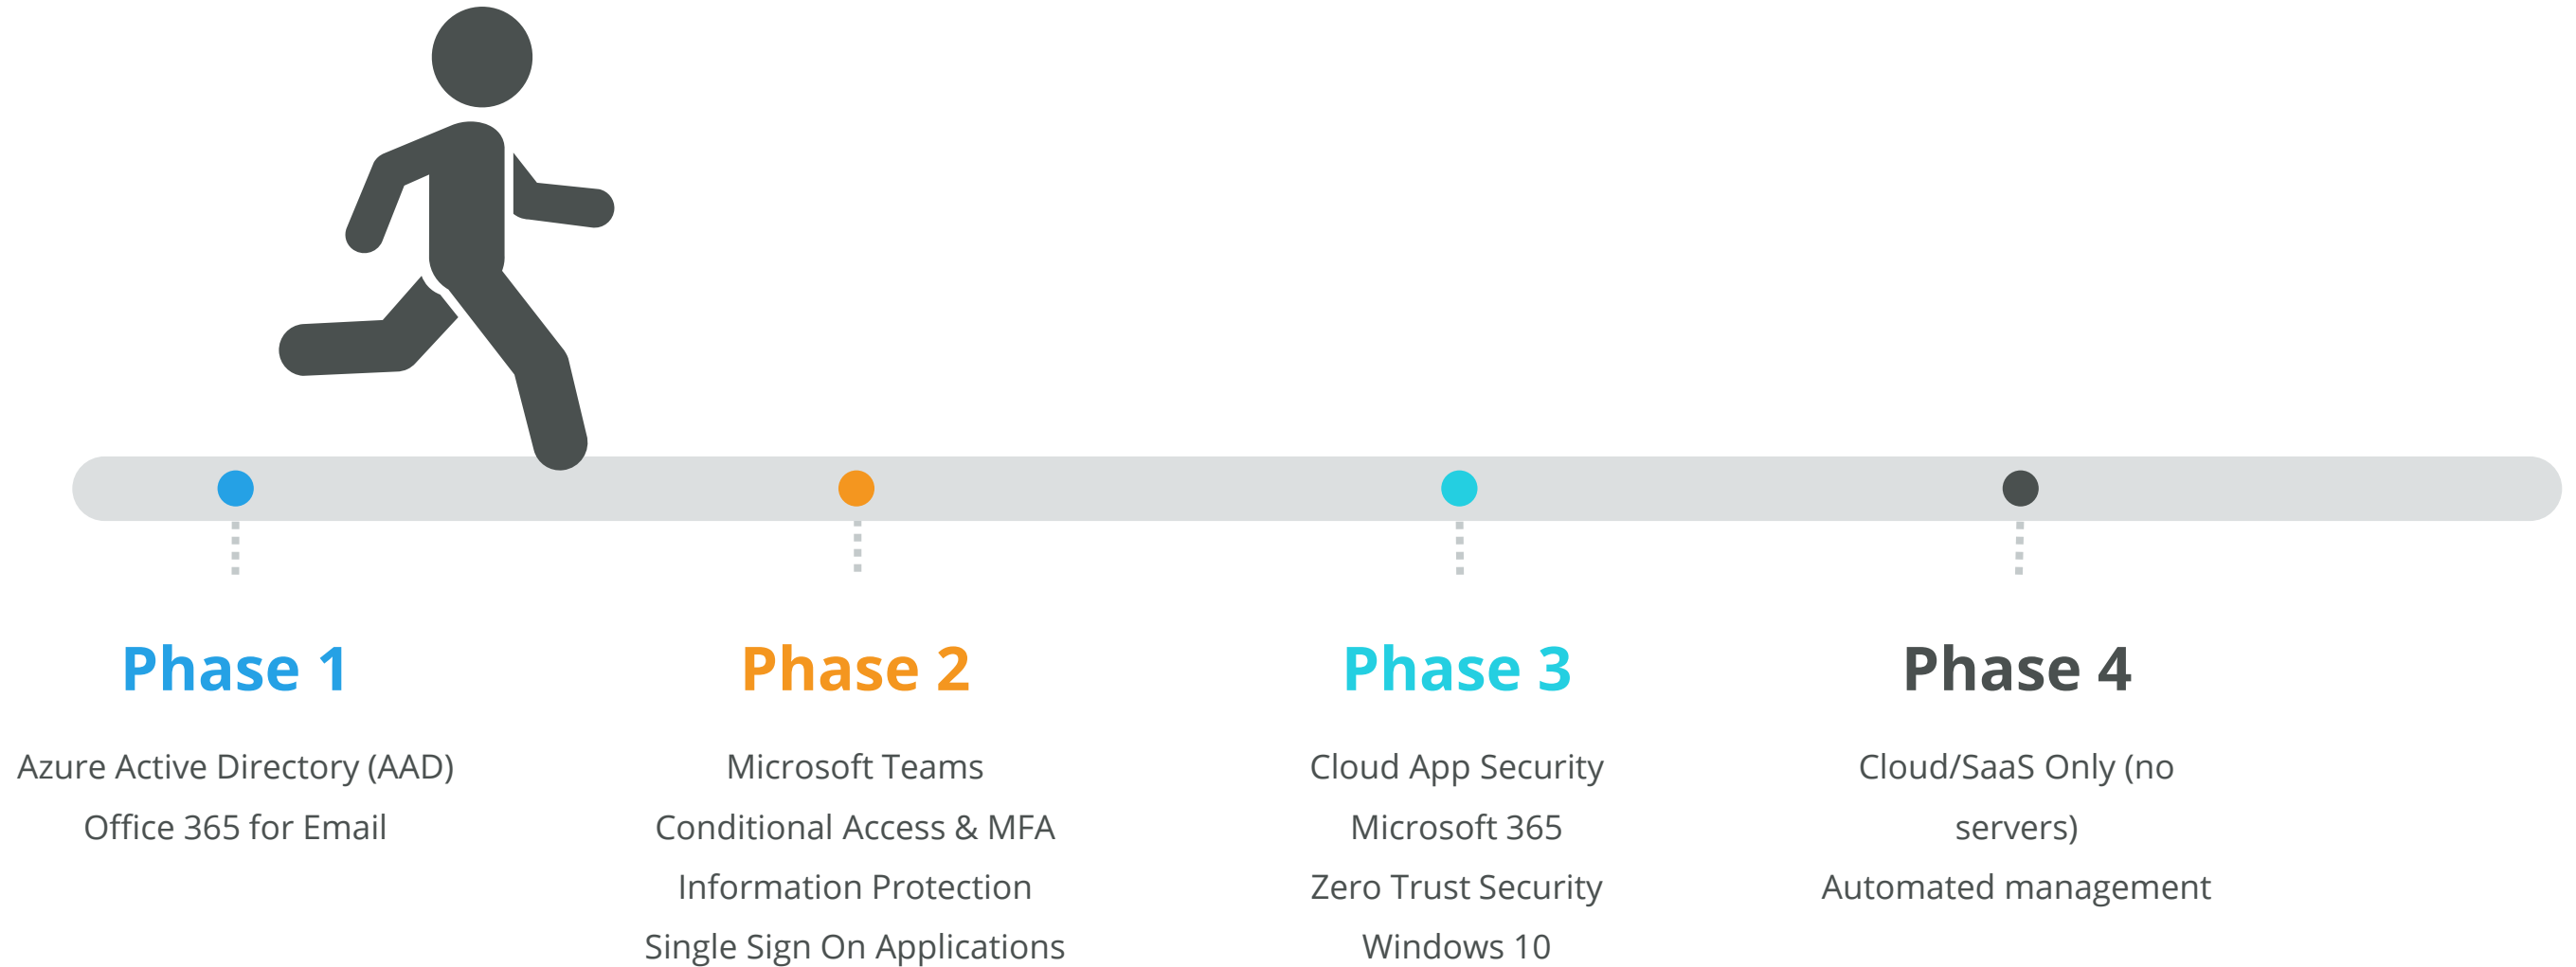

Overview

AgileSecurity

AgileSecurity: Mission

- Onboard customers to security services based on cloud services
- Provide continuous updates to meet the ever-changing security landscape
- Provide flexible options to meet a diverse customer landscape
- Provide industry specific solutions from industry to governments

Path to a Modern Workplace

Agile IT Services

AgileSecurity

Continuous security updates and responses

AgileCover

Ongoing monitoring and maintenance. Fundamental for good security hygiene

AgileProtect

Back up and restore services to enable recovery for business continuity and information protection

Agile IT Automation

Enterprise deployment, defined and deployed via managed scripts, and more
