The Bauen Group

DSRIP Dashboard and Reporting

Report with Confidence. Measure Progress. Improve.

Success for healthcare providers requires the ability to integrate care plans and data with medical providers. It requires a system that accurately measures accountable care and provides a basis for aligned services and shared savings.

Our cloud-based platform contains all the tools necessary to provide high quality, integrated patient care, track progress toward value-based care benchmarks, use population health analytics to minimize business risk, and develop innovative initiatives to address social determinants of health and maximize their performance.

✓ Accurate, automated processing of DSRIP measure data & analytics

✓ Identify areas of opportunity for improved data capture

✓ Dashboards that shows progress toward your goals

✓ A partnership that meets all your IT & Analytics needs

✓ Secure adaptable solutions

Your DSRIP solution. As simple as:

1

2

3

Streamlined, Automated DSRIP Reporting

- Aggregates data from disparate sources
- Applies rules to Normalize Data
- Provides daily or near real-time updates
- Full Reporting to HHS

Automated Measurement for DSRIP Reporting

Improved Data Quality & Measure Performance

- Identify differences between measure requirements and data entry practices
- Cleanse and normalize data
- Improve record keeping and trending to better track performance

Integrate with EHR, Claims, HIE data, and more

Intuitive and Interactive Dashboards

- View Clinical and Quality Measure Performance
- Identify Successes and Gaps on the Care Continuum
- Client Mapping and Hotspotting

Track Progress Toward Measure Benchmarks

The DSRIP Dashboard allows you to report easily, accurately, and with the tools to monitor and improve your measures.

Our Capabilities

Powerful, Accurate, & Timely Reporting

- Integrates with any EHR, HIE, or other data sources
- HEDIS® & VBP4P certified measure engine
- Automated reporting to make life easier
- Increased timeliness for your data

Powerful Tools and Security with Azure

- No additional infrastructure needed
- Connect with any data provider
- Advanced security - multi-factor authentication, just-in-time-access, and advanced encryption
- Optimized Cloud Infrastructure minimizes costs

Superior Service & Adaptability

- Custom report, measure, & application development
- Easily scalable as your business needs change
- The most responsive customer support you can find

The DSRIP Dashboard

The DSRIP Dashboard will help you reach your benchmarks, maximizing payments while improving outcomes.

Helping you reach your targets by:

- ✓ Evaluating all of your current data sources and collection processes
- ✓ Integrating with your EHR and any other relevant data sources
- ✓ Analyzing data to identify areas of opportunity for improvement
- ✓ Easily viewing and communicating performance gaps down to the provider level
- ✓ Consulting with providers to implement process improvements and achieve better outcomes

Why The Bauen Group?

Our team includes a unique mix of professionals with expertise in medicine, hospital administration, data science, analytics, cloud infrastructure, and modern application development.

Our adaptable, service-first offering fits easily into your existing environment, reduces your effort to report, and assists you in improving measure and care outcomes.
