- + **ISO 45001** Health & Safety Management accredited
- + **Cyber Essentials Plus** security accredited
- + **Security Cleared (SC)** Engineers & Consultants
- + **Service Desk Institute 3 Star** Service Desk accredited

Business Continuity Management

The image features three paper airplanes on a light blue background. The top airplane is orange and is positioned at the end of a dashed white line that curves upwards from the left. Below it, a white airplane is at the end of a horizontal dashed white line. At the bottom, another white airplane is at the end of a horizontal dashed white line. The text 'Assessment Approach' is written in orange on the right side of the image.

Assessment Approach

Our Client Pathways

Our services are designed to support our clients needs through end to end transformation regardless of current cloud adoption maturity.

New To Azure ?

Azure Mature ?

Optimise & Manage

Approach To Cloud Adoption

Our Assessment Services

The **Azure Cloud Migration Assessment** is collaboratively delivered by our accredited Cloud Solution Architects using advanced toolsets to analyse your existing IT infrastructure and map this into an Azure architecture blueprint. For clients looking to migrate from on-premise data centre environments to Azure, we will deliver concise guidance and actionable insights along with a high level migration plan to support your cloud adoption journey.

Cloud Viability Workshop

- Half-day remote workshop
- Business objectives
- Review existing workloads
- Review licensing and compliance
- Landing Zone Right-Sizing review
- Cost drivers
- Present recommendations

Azure Cloud Migration Assessment

- Cloud Strategy review
- License, compliance, security and cost drivers
- Understand underlying concerns or blockers
- Financial projections (CapEx, OpEx and total cost of ownership)
- 2-6 week workload scan and tools-based analysis
- Custom-built report detailing lift and shift costs for Azure
- High-level migration plan, with recommendations presented

Azure Best Practice Review

- Consultancy for organisations already using Microsoft Azure
- Understand underlying concerns or blockers
- Review design of subscriptions, resource groups, resources
- Review security, compliance and costs
- Advice on how to scale your cloud for enterprise adoption
- Recommendations presented

Azure App Modernisation Assessment and HLD

- For custom built apps where help is needed to determine app re-architecture options
- Cloud Strategy workshop focussing on app modernisation
- Current/Future Operating Model focussing on development
- Financial Projections (CapEx, OpEx and Total Cost of Ownership)
- 2-6 week workload scan and tools based analysis (where required)
- Content highlighting app readiness to move to Azure, code changes, PaaS costs
- Recommendations, HLD and presentation

Rapid Azure Migration Plan (RAMP)

- Rapidly migrate priority workloads to Azure safely and securely
- Half-day assessment, licensing and strategy workshop
- Migration plan
- Project management
- Standard Velocity Landing Zone build aligned to Microsoft's Cloud Adoption Framework (CAF)
- Migration of your first three workloads into Landing Zone (rehost)
- 24/7 Early life support
- Project documentation, roadmap recommendations and presentation

Deliverables

Following analysis of your infrastructure environment we will present a detailed report showing options and recommendations to support your Azure Migration business case including:

- + Workload migration with minimal changes (lift-and-shift)
- + Modernisation opportunities such as SQL PaaS
- + Cost reduction strategies including Right-Sizing
- + Licensing opportunities with Azure Hybrid Benefit (AHUB) and Reserved Instances (RI)
- + Projected consumption costs and savings through optimisation
- + Backup & DR considerations
- + Dependency mapping and workload grouping
- + Risk and exposure identification
- + Strategic guidance on transformative Cloud native services for your workloads

Content + Cloud

Living + Breathing
Client Success

“Content + Cloud delivered exactly what was needed to ensure a successful business outcome – from technology design and architecture, to delivery and execution and on-going support and services. Having helped us successfully transition CAS into the Cygnet environment, we now have a strong foundation to drive that transformation forward.”

David Ewing, IT Director, Cygnet Health Care
