## eSiteview

When you need to take another look at your site or travelling is not an option, eSiteview brings your site to you.

eSiteview is a reality capture of your actual site and enables you gain instant remote access to your facilities, structures, and equipment. With the eSiteview you can visit your site anytime and anywhere via simple browser interface. Gain crucial insight of your site and improve your sites safety and operational excellence.

With the power of Azure you can easily utilize your existing data or other Azure operations and visualize them in eSiteview.

eSiteview is a virtual duplicate of your site where you can mark maintenance tasks accurately, visualize production data, or even measure if it is safe to perform your tasks without ladders or scaffolding. Open a whole new perspective to organizing your operations and maintenance.

During plant modifications, input data for planning is a key success factor. Instead of travelling and examining your site on the spot, we offer new solutions to bring the site to your project experts. Planning, designing, engineering, and innovating from a distance allows you to take a fresh look at your project

We create a balance between safety and cost-effectiveness at your site. For us, that means preparing for the unexpected by experiencing and learning the right behavior. We do it in safe and risk-free virtual environments.

Safety first is our strong message. We offer possibilities to demonstrate your site in an easy and safe environment without taking people to hazardous conditions on site. Make an interactive photo-realistic virtual plant tour accessible in every situation, at the plant, or at the headquarters of your company.

# Microsoft Azure

Microsoft Azure is an ever-expanding set of cloud computing services to help your organization meet its business challenges. With Azure, your business or organization has the freedom to build, manage, and deploy applications on a massive, global network using your preferred tools and frameworks.

## WHY AZURE

### Be future-ready

Continuous innovation from Microsoft supports your development today and your product visions for tomorrow. With 1,000+ new capabilities in the past year, you can build on the latest advancements in AI, blockchain, Kubernetes, containers, and databases to keep you ahead of the curve.

Our enterprise-grade analytics solution outperforms the competition, costs less, and is fully compatible with your existing development, BI, and data science tools.

### Build on your terms

You have choices. With our commitment to open source and support for all languages and frameworks, you can build and deploy how you want to. Take advantage of the full-featured, integrated development environments with built-in support for Visual Studio and Visual Studio Code, the most popular IDEs trusted by 15M+ developers.

We embrace open source, drive innovation through collaboration, and contribute back to the community.

### Operate hybrid seamlessly

On-premises, in the cloud, and at the edge—we'll meet you where you are. Integrate and manage your environments with tools and services designed for hybrid cloud.

Enhance security, simplify access, and set smart policies across your different environments with a single identity platform trusted by 90 percent of enterprises globally.

### Trust your cloud

Get security from the ground up, backed by a team of experts, and proactive compliance trusted by enterprises, governments, and startups.

With its \$1B+ investment in security R&D and 3,500 cybersecurity experts, security is foundational for Azure.
