

QUICKBLOX

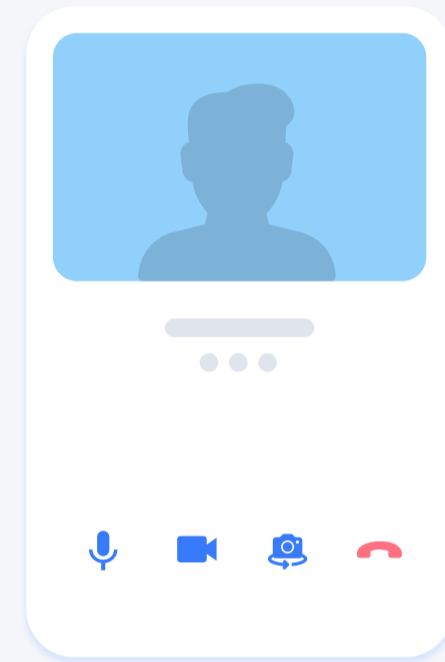

Add communication to any app or website
hosted on your Azure virtual machine

Functionality

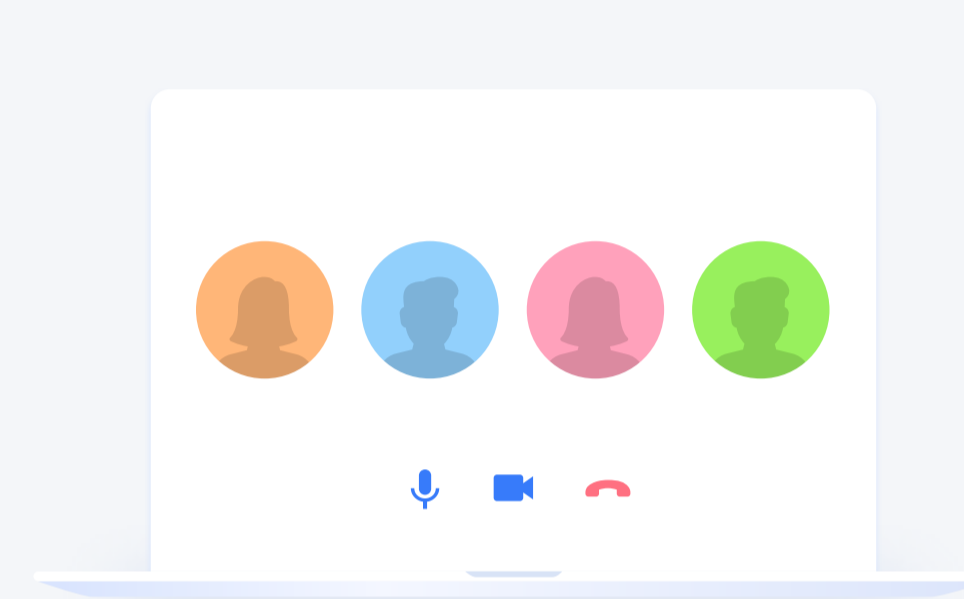

Use our APIs or SDKs to make the communication app with the custom features including:

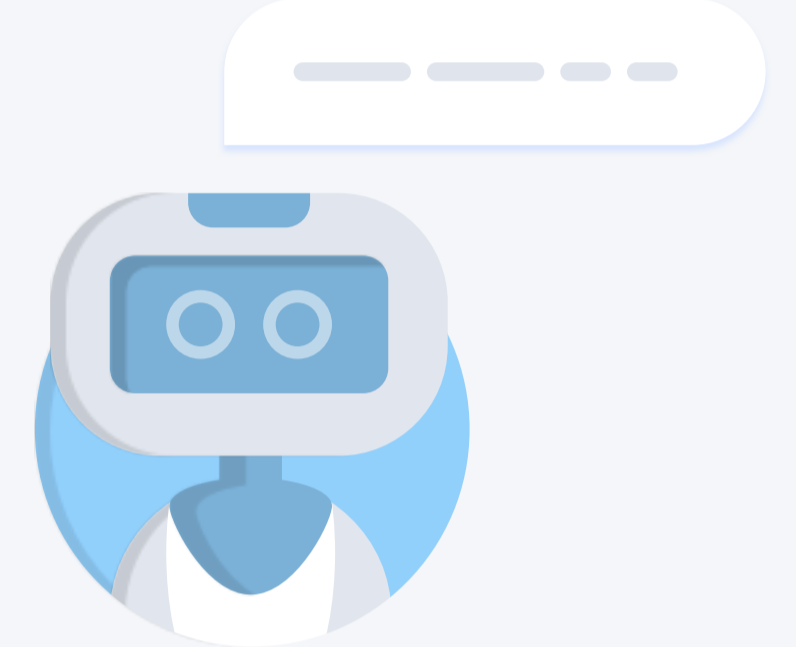

Private and group chats

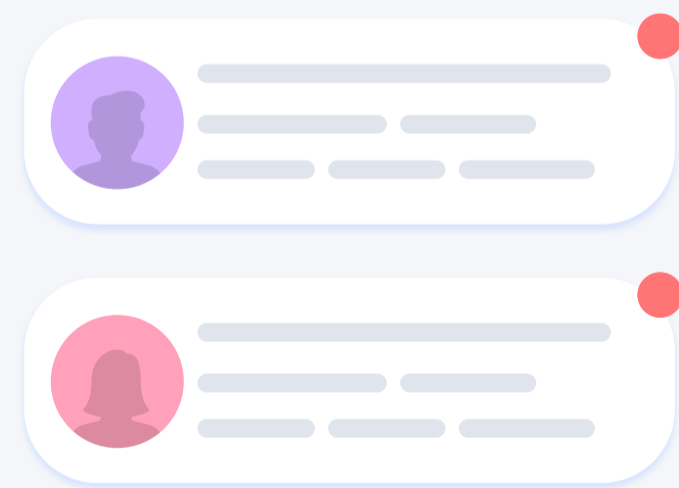

Video calling

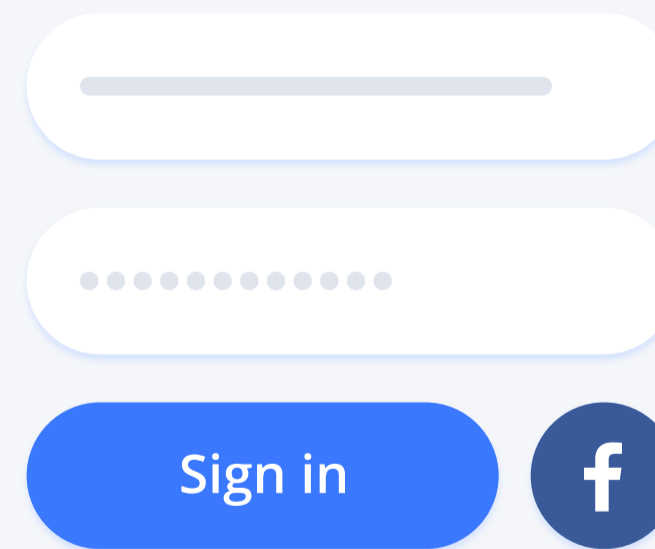

Conference calling

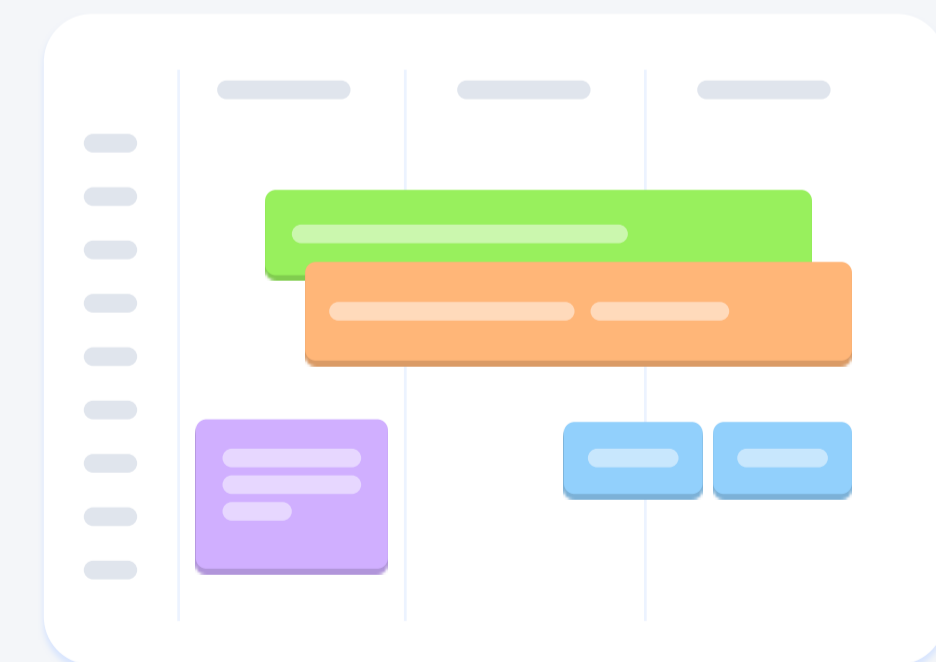

Chat-bots

Push notifications

User authentication

Custom data storage

Communication ready-made for your app

Privacy
within their
organisation

Traceability
and administration

Security
protected
communication

Control
of users and data

Ownership
of hosting, data,
users and services

Where business meets benefits

Time-efficient

With an API or SDK, a complete solution is deployed in a matter of days while custom development will take months of hard work.

Easy-to-integrate

Our SDKs and APIs are quick and straightforward to integrate with support and maintenance provided by our team.

Money-saving

No need to spend thousands of dollars for a custom solution when you can have an effective communication tool at a fair subscription fee.

Messaging + Notifications = Key layers of every meaningful mobile app

Use cases

Healthcare

For healthcare, nutrition and fitness organization, QuickBlox provides secure, reliable and HIPAA-compliant communication solutions. Our products guarantee effective communication between all members of the healthcare delivery chain with top-level data protection and security.

Corporate & Enterprise

QuickBlox's enterprise-ready communication solutions will enhance corporate systems of any scale and purpose. The feature-rich and highly secure communication products will meet all needs of your enterprise and can be easily integrated into your existing ERP systems.

Banking & Finance

The finance industry depends on effective communication. QuickBlox communication products are used by banks offering on premise mobile wallets and customer care to innovative fintech startups offering loans & peer-to-peer money transfers.

Marketplaces & e-commerce

Connect your consumers with the best chat, messaging, and communication platform for your marketplace and e-commerce. Deep link to product pages, share product details and engage directly with consumers in real-time.

Social Networking

A social network is impossible without effective chat and communication features. With the QuickBlox products, social networks are getting a complete communication stack with private and group chats, content sharing and advanced security mechanisms.
