

SQL Azure Migration Use Case

Client:

International Hotel,
Casino, & Restaurant
Chain

Products:

SQL 2008 to Azure

Services:

Assess, Design &
Migration

Challenge

- ✓ Customer running 14 SQL Server 2008 workloads in production which reached End of Support
 - ✓ Wanted to extend their investment by migrating all 14 production workloads to Azure
 - ✓ HIPAA requirements require extended security support
-

Solution

- ✓ SQL Migration to Azure Assessment and Design Services
 - ✓ SQL 2008 to Azure Migration and Extended Security Update
 - ✓ SQL production cut over and ongoing support
-

Outcome

- ✓ Provided Assessment configuration, and validation project plan
- ✓ Successfully migrated 14 SQL Workloads to Azure and added the extended security update for HIPAA regulatory compliance
- ✓ Final cutover and ongoing support for production workloads
- ✓ After successful migration, customer is wanting to move additional workloads into Azure
