

eReadiness by IDM

Don't make the headlines by missing the deadlines..

You CAN be in control of your estate; with peace of mind that your business is safe...

eReadiness - Windows 10 made easy. Reduce Cost, Cyber Attacks & Downtime.

There won't be a Windows 11...You've guessed it – or are already experiencing it – this can mean keeping Windows 10 updated with upgrades, patches & application compatibility feeling like a time consuming and stressful casino... It doesn't have to be that way.

Start using eReadiness today and begin to take out the risks and labor-intensive way you handle your desktop estate.

Find out why other companies are starting to enjoy the transparency they deserve, effective hands-on desktop management capability, seamlessly taking on migration hurdles, whilst ensuring costs and vulnerability exposure is addressed every minute of the day.

Hitting the news headlines or budget ceilings for the wrong reasons, most experts agree most of your exposure comes from the desktop estate. Obviously then, you take the mandatory Windows 10 upgrades for your organization very seriously. The Big Bang version launches (i.e WinXP, Win 7) are replaced by a subscription model (more frequent upgrades), with a new, broader and more disciplined set of tasks awaiting every business. Windows upgrades, hardware, drivers and application compatibility need planning and implementation excellence. Are you ready?

Take control – minimise and control risks

Any business is at risk if they don't maintain Microsoft's new upgrade and update strategy. Organizations that fail to update properly risk becoming unsupported by Microsoft and unprotected against the latest threats; i.e. ransomware and other malware, as their Windows version is starved of the latest security updates. Take control of this risk, by enjoying the benefits of the powerful eReadiness command and control center. Initiate, manage and

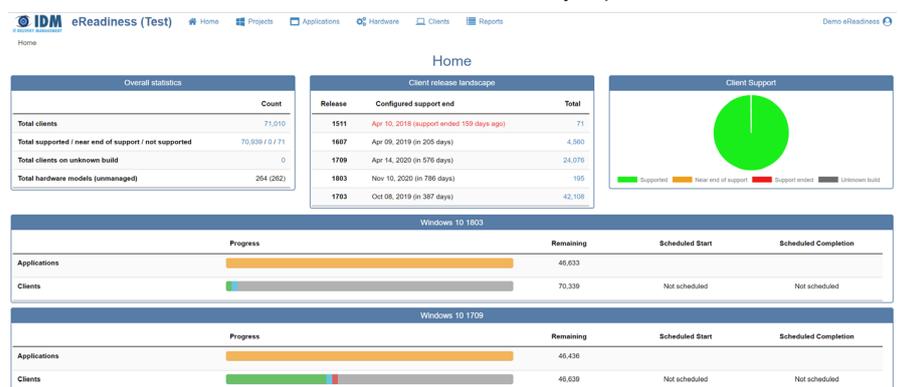

check everything has been done to secure your organization into the next phase of the Windows 10 lifecycle, thanks to the eReadiness' clear dashboard and toolset available...

eReadiness means: being in control, every step of the way

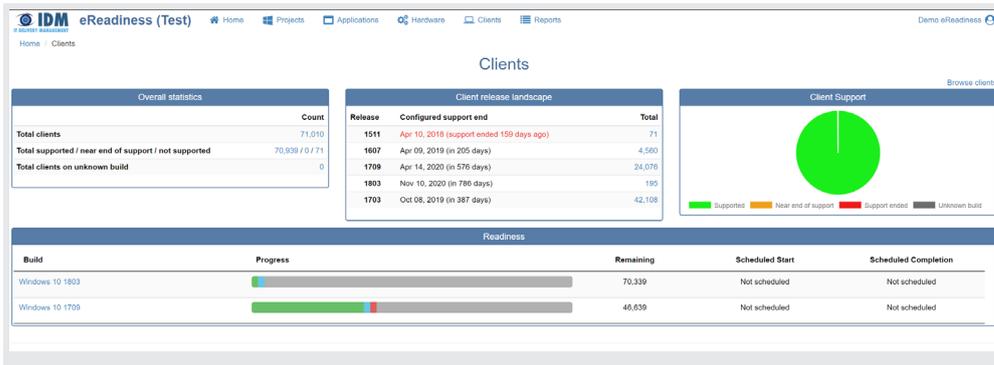

eReadiness offers the tools to turn a time-consuming, normally disruptive process into a seamless set of manageable projects. Question: How do we remove the time, version control and quality issues with out-of-date spreadsheets and databases? Answer: A single pane of glass - It's all there for you, in eReadiness!

A sound investment, because:

- eReadiness serves as the single point of truth – offering reliable transparency of where you are and what needs to be done – 'AT LAST!' we hear you say.
- eReadiness reporting allows access to Analysts, Team Leads & Managers – meaning everyone is focused on same key progress and activities.
- eReadiness prevents costly mistakes - ensuring no process step is forgotten.
- eReadiness helps you organize and implement more in less time.
- eReadiness helps eliminate the risk of missing upgrade deadlines and hence incurring 'Out of Support' costs & Security exposure to the Business.

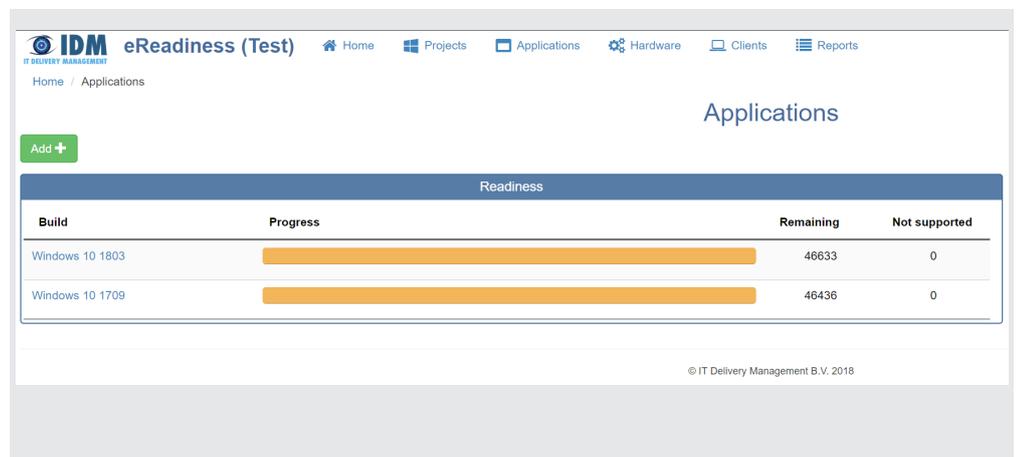

eReadiness: Managing Windows 10 investments, risks & delivery made easy. Enjoy how to stay ahead of the game...

Why eReadiness? 6 compelling reasons.

- 1 Stay out of the headlines and meet the deadlines** - Every week it seems companies have Security breaches and hit the news – threatening the organization as a whole – or jobs are on the line. Windows 10 has tight migration, upgrade and patch cycles - and ignore the more focused way of working at your peril. Meet all deadlines and don't risk becoming unsupported or miss out on new features. eReadiness helps keep your business safe!
- 2 All the insight and overview you'll ever need** - eReadiness offers unparalleled transparency alleviating the complicated and new processes of Windows 10 upgrades. It's a powerful, practical and efficient tool that helps save time and money. Enjoy a simple to use overview of everything that is going on, from upgrading, updating and testing.
- 3 Now you are really in control** - eReadiness helps your organisation to be ready for business in the most simple, practical, and efficient way! With eReadiness, being in control means knowing where you are in the process and lifecycle, what has been done, what is ahead, what remains to be solved or administered. eReadiness is a powerful and easy-to-use management tool with a simple deployment ring, wave and collection methodology to Windows 10 management. You choose the best approach; i.e. where you get the most bang for your buck; the order against volume or priority of which applications to upgrade first. eReadiness offers key business readiness hardware and software information per deployment project.

- 4 Make things happen – don't wonder what's happening!** - Whether or not you are responsible for these activities in a business or provide this service for customers, eReadiness leaves no loose ends and eliminates the guesswork and stress from your migration and upgrade processes. eReadiness offers the assurance that your organisation is up to speed with the latest migration and upgrade requirements of Windows 10 – and that your risks and liabilities are properly managed. eReadiness helps validate, supports structuring to get in and stay 'in control' of these key Windows 10 update activities within the organisation.

- 5 Unparalleled managing, steering and reporting capabilities** – eReadiness is an invaluable feature for any organisation, both for internal managing and steering purposes to C-Level. eReadiness supports status reporting as well as planning the next steps in the update processes/lifecycle. This includes keeping up with the multitude of application testing efforts that usually follow after update activities in decentralised environments, often in many countries, in different languages and performed by many different teams. Statistics show the actual progress (RAG status and in numbers) per PC, applications, rings/waves including and whats left to be done.

- 6 It's been designed for you and with clear purpose** - eReadiness is a dedicated tool for an organization and is specifically targeted to control and manage Windows 10 migrations and upgrades. That focus allows eReadiness to be simple and straightforward meaning the tool can easily deliver against the shape of your organization – not that your organization needs to change shape to fit the tool. Isn't that great?

Don't play the Risk Casino, you could lose the house. Without the all-important security updates, your organisation is vulnerable & unprotected. eReadiness helps keep your business safe!

It's all there, ready to go!
If you feel that taking control over the Windows 10 migrations and upgrades of your organisation is crucial, eReadiness is the tool to use. There is no need to build your own excel sheets with version control issues and data that seems to change depending where the last spreadsheet came from. Also be wary of something bespoke in-house, risky to support and keep relevant. eReadiness is ready to go, all powered up with the tools that offer the control you crave, starting today! The clock is ticking...

Key Benefits

eReadiness allows you to easily work with all aspects of managing Windows 10

- Stay in control of the mandatory Windows 10 upgrades
