# Simplify Wireless Connectivity Management with CAMP™

Effectively managing wireless connectivity across multiple devices deployed in various locations can be complex for IoT resellers and solution providers.

CAMP™ enables solution providers to streamline wireless connectivity management to ensure a seamless deployment for their solutions and customers.

Easily manage and scale wireless connections with greater visibility into real-time data usage and functionality on a single IoT platform at any time.

CAMP™ Platform Features

COMPLETELY CONTROL WIRELESS DEPLOYMENTS

Instantly activate multiple SIMs and transfer SIM inventory across accounts. Easily manage instant SIM swaps, phone number changes, port requests, and suspending and restoring services across all devices on a single connectivity platform.

GET REAL-TIME ALERTS AND ANALYTICS

Receive real-time email alerts and access analytics on usage, activation requests, activation confirmation, international usage and overages, tickets, and billing to gain greater visibility into deployed wireless activations.

GET INSTANT DATA WITH CARRIER API

CAMP's™ carrier-integrated APIs enable solution providers to manage instant activations, data usage, number change requests, tickets, and receive alerts in real-time.

CAMP™ Platform Features

ACCOUNT MANAGEMENT

Easily toggle between rate plans to view plan details, pricing, and features compatibility to get the most cost-effective data plans.

INTEGRATED CHECK COVERAGE

Validate connectivity prior to activation and view coverage levels and availability by zip code, address, or search specific locations to ensure your clients always have a reliable wireless connection.

PLAN FOR FUTURE CHANGES

Plan for future changes and avoid costly mistakes in managing activations, plan changes, static IPs, port requests, SIM swaps, and more by creating tickets and reminders in advance with CAMP™ Future Ticketing.

Simplify Wireless Connectivity with Choice Business Connections

Choice Business Connections partners with IoT resellers and solution providers to deliver data, voice, messaging, and international plans that simplify wireless connectivity and maximize profitability. Our flexible connectivity solutions operate on the fastest growing 4G LTE network and CAMP™ is prepared for 5G connectivity to provide reliable coverage and international services.

By leveraging CAMP™, our partners can automate and streamline processes to improve wireless management of multiple SIMS. With access to real-time data and analytics, solution providers gain greater visibility into data usage and spend to minimize operating costs.

Simplify wireless management, streamline SIM activations, and easily access data to effectively oversee all wireless connections on a single platform.
