KEY FEATURES OF MICROSOFT DYNAMICS 365 BUSINESS CENTRAL

- Agile, powerful and simple-to-use ERP environment.
- Seamless processing, transacting and reporting for all financial areas.
- Adaptability for business growth to meet market pressures and client demands.
- Development environment to streamline extensions and support.
- Sophisticated framework for integrations with third-party systems.

*Dynamics 365 Business Central can be deployed with or without the Inventory module.

DYNAMICS 365 BUSINESS CENTRAL
8-WEEK IMPLEMENTATION

In addition to system configuration, Western Computer provides support throughout your entire project to achieve a full implementation within 8 weeks:

PROVEN METHODOLOGY

It's important to look beyond the cost of software and hardware. Long-term ownership, maintenance costs, and required skills must also be considered in conjunction with the system functionality. Western Computer solves this challenge with a proven methodology implemented on more than 500 client projects. We start with a demo showing standard processes and then map our methodology to your needs. This ensures we not only provide a superior implementation, but also enable swift knowledge-transfer to your staff.

DEDICATED PROJECT MANAGEMENT

To achieve a high degree of satisfaction, our project managers work closely with clients to plan and execute all project aspects. This enables us to meet the implementation goals within the established time frame and budget.

- ❯ **Project kickoff meeting**
- ❯ **High-level overview of expectations**
- ❯ **Ongoing project schedule reviews**
- ❯ **Portal access to check on project status**

COMPREHENSIVE TRAINING

Western Computer workshops ensure your IT team is ready to support the new ERP solution and your end-users feel comfortable with the new technology—so both groups can work productively.

- ❯ **Data migration and permissions workshops**
- ❯ **End-user training**
- ❯ **System testing workshop**
- ❯ **Access to the Microsoft Learn platform**

GO-LIVE READINESS

Before going live with your new Dynamics 365 Business Central deployment, Western Computer makes sure your chart of accounts, customers, vendors, and inventory items are all set up correctly. We also confirm your beginning bank balances, open bank transactions, accounts receivables, and accounts payable all migrate properly. We then conduct a pilot test run to prep for the cutover followed by go-live support.
