Rental Process Management (RPM)

Enterprise Software for Companies that Rent, Sell, & Service Equipment

Suite Engine's Rental Process Management (RPM) software solution is built on Microsoft's ERP solution, Dynamics 365 Business Central, for companies that rent, sell, and service equipment. RPM provides a unique balance of a world class ERP for distribution and combines industry leading rental and service functionality. Deploy our solution on-premise or on Microsoft's Business Central cloud to boost your productivity and improve customer insight. Work anywhere, anytime, across all your devices to position your business for growth.

Microsoft Dynamics 365 Business Central is sold, implemented, and supported by a global network of solution consultants called Microsoft Partners. Suite Engine is a wholly owned subsidiary of one of the largest North American resellers of Business Central (BC) with over 400 customers. Our combined company is also the largest employer of Business Central experts in the US, including 20+ full-time developers with no outside contractors or consultants — everyone is 100% focused on serving our clients.

RPM is an enterprise rental solution that consolidates insight into all accounting and operations down to the rental unit. Capture all revenue, maintenance (parts & labor), utilization, depreciation, acquisition cost, and asset improvements. Our industry knowledge, functionality, and commitment to the rental industry provides companies that rent, sell, and service equipment an unparalleled option to maximize their revenue and reduce cost.
