

# New approach to Microsoft 365 email security keeps patient data secure

"We know we're continually being attacked by email threats that are becoming more sophisticated than ever. One email is all it takes to destroy a business.

The health services sector is the most targeted sector, surpassing financial services. The regulatory requirements governing data privacy and reporting are now more stringent than ever, bringing cybersecurity on to our board's radar.

We needed a leading email security vendor to defend our company's inboxes. That's why we have MailGuard. We were using native Microsoft 365 email filtering and we wanted a cloud email security specialist to add greater protection.

The security landscape is constantly changing – there are new threats every day and we need to make sure that all of the vendors we work with in the security space are continuously evolving, updating and improving their technologies.

Just like every other organisation, we have happy clickers. You can't stop or track what each employee is clicking every single minute of the day, so you must have the right protection in place to ensure that peace of mind.

MailGuard does this for us."

**HEAD OF IT, CAPITOL HEALTH**

## At-a-glance:

**Customer:** Capitol Health

**Website:** [www.capitolhealth.com.au](http://www.capitolhealth.com.au)

**Customer Size:** 1,000,000+ patients

**Country:** Australia

**Industry:** Healthcare

**Products and Services:** Diagnostic Imaging

*"Just like every other organisation, we have happy clickers. You must have the right protection in place to ensure that peace of mind. MailGuard does this for us."*

– HEAD OF IT, CAPITOL HEALTH

## The problem

"We all know that a trillion emails go around the world every day, and that 90% of cyberattacks start from email. It's a massive attack vector because it's so easy.

That's why if we only have native Microsoft 365 email protection, we would be much more vulnerable to getting attacked.

The number of emails that an additional layer of email security like MailGuard stops is huge."

## Stop up to 15% more threats with Microsoft 365

Phishing, Ransomware, BEC are things we never want to personally experience. One email is all it takes to destroy businesses. Microsoft 365 users are prime targets. MailGuard 365 makes life safer and easier for those users. It's the last check before staff could make a catastrophic mistake.

Adopting an evolutionary approach to email security, MailGuard 365 is exclusive to the Microsoft Marketplace. It is a cloud-based email security solution made better together by our collaboration with Microsoft. MailGuard 365 combines 19+ years of specialized email security expertise and IP from MailGuard, with the best of Microsoft Azure and ML/ AI.

## Key benefits:

### Single-click Activation

Activate enterprise-wide protection within a minute. No download required as MailGuard 365 is built on Microsoft Azure and is activated in the Microsoft marketplace with your Microsoft credentials. Get started with a single click, stopping advanced email threats immediately.

### Evidence-based reporting

Complementing upstream security services like the Microsoft 365 security stack and other third-party email security vendors, MailGuard 365 takes a new approach. This means it is last to inspect emails, allowing for world first evidence-based reporting that demonstrates its stopping power.

### No end-user training

Designed to provide peace of mind to end-users and IT admins, MailGuard 365 works in the native M365 environment with no set-up headaches. Threats are moved to the users' junk and deleted items folders, so no additional training is required.
