

# MAILGUARD 365

[mailguard365.com](http://mailguard365.com)

# Phishing, Ransomware, BEC are things we never want to personally experience. One email is all it takes to destroy your business.

The challenge of email-borne cyberattacks is not a new one. It's a global epidemic that is crippling businesses, destroying reputations and having devastating economic repercussions.

## EVERY COMPANY HAS HAPPY CLICKERS

*"Every company has at least one employee who will click on anything, and that is pretty hard to protect against."*

Brad Smith,  
Microsoft President & Chief Legal Officer

## MULTI-LAYERED SECURITY

Experts agree that a multi-layered approach to email security is required. Gartner reports that *'35% of client organizations that move to Microsoft 365 are supplementing its natively available email security capabilities with a third-party product.'*

## BOOST MICROSOFT 365 SECURITY

Businesses want a simple solution that enhances the value in Microsoft 365 by adding a specialist email solution to their security stack, without the need to train end-users or to configure and manage another admin console.

# MailGuard 365

A world-first evolutionary approach that is collaborative by design, MailGuard 365 re-scans for new threats, inspecting email after it passes through your Microsoft 365 security stack and any other 3rd party email security vendors. It stops up to 15% more threats with Microsoft 365. It's the last check before your staff could make a catastrophic mistake.

## STOP CRIMINAL INTENT EMAILS

Phishing, ransomware, BEC are things we never want to personally experience. Working on the inside of Microsoft 365, MailGuard 365 re-scans & stops email threats after they have passed through Microsoft 365, providing added protection for your business.

## EVIDENCE-BASED REPORTING

With its new evolutionary approach, MailGuard 365 is last to inspect emails, allowing for evidence-based reporting that demonstrates its stopping power, and complementing upstream services like the Microsoft 365 security stack and any 3rd-party vendors.

## ACCELERATED PROTECTION

Speed is the new currency, and MailGuard 365 leads the market in finding & stopping threats that may have slipped past Microsoft 365 security. It stops advanced criminal intent email threats from reaching end-user inboxes.

# MailGuard 365 stops up to 15% more threats with Microsoft 365

Exclusive to the Microsoft Marketplace, MailGuard 365 is a cloud-based email security solution made better together by our collaboration with Microsoft to meet the needs of Microsoft 365 users. It stops up to 15% more threats with Microsoft 365. MailGuard 365 combines 19+ years of specialized email security expertise and IP from MailGuard, with the best of Microsoft Azure and ML/ AI.

## SINGLE-CLICK ACTIVATION

Activate enterprise-wide protection within a minute. No download required as MailGuard 365 works from the cloud and is activated with your Microsoft credentials. Your organization is protected with a single click, with advanced criminal intent email threats stopped immediately.

## NO END-USER TRAINING

Designed to provide peace of mind for your end-users, MailGuard 365 operates in stealth within the native Microsoft 365 environment. Threats are instantly moved to users' junk and deleted items folders, so no additional training is required.

## EASY FOR ADMINS AND PARTNERS

For admins and partners it's easy too. No configuration is required for set-up, and there's no quarantine email to manage, or consoles to administer. Whitelists and blacklists in Microsoft 365 are honored.

# Customer success: Capitol Health

*"The number of emails that an additional layer of email security like MailGuard stops is huge – on a daily, weekly, and monthly basis.*

*Just like every other organization, we have happy clickers. You can't stop or track what each employee is clicking every single minute of the day, so you must have the right protection in place to ensure that peace of mind.*

*MailGuard does this for us."*

– HEAD OF IT, CAPITOL HEALTH

## FIRST TO STOP TARGETED EMAIL THREATS

*"When it comes to managing cyber threats, Capitol Health's goal is to bridge the gap between speed of attack and speed of defense, and to maintain the confidentiality, integrity and availability of data and business operations."*

## ENHANCED EMAIL SECURITY

*"We were using native Microsoft 365 email filtering and needed to add a specialist cloud email security solution. Email threats are getting more sophisticated, so the best way to prepare for that is with multi-layered email security that uses a best-in-breed solution to defend our company's inboxes. That's why we have MailGuard in place."*

## RELIABILITY IS VITAL

*Combining 19+ years of email security experience and IP with the best of Microsoft Azure, "[MailGuard] provides secure and stable infrastructure, plus it provides exceptional customer service."*

## Channel partner success: Jasco Consulting

*"MailGuard 365 just works. Choosing the MailGuard 365 solution to recommend to our clients was a no-brainer.*

*The MailGuard 365 solution is just so simple to deploy and it instantly protects our clients from email threats that slip through third party or Microsoft 365 email security."*

– SERVICE DESK TEAM LEADER, JASCO CONSULTING

### COMPLEMENTING MICROSOFT 365

Jasco Consulting is a trusted Microsoft partner that provides information security solutions to manage clients' risks. So it was concerning when clients using Microsoft 365 reported email threats slipping past their existing security filters. MailGuard 365 was a perfect solution, with daily evidence-based reports demonstrating the additional threats stopped.

### PROTECTING SENSITIVE DATA

Jasco Consulting's clients have sensitive data to protect. *"Choosing the MailGuard 365 solution to recommend to our clients was a no-brainer... as a best-of-breed email security solution... it instantly protects our clients from email threats that slip through third party or Microsoft 365 email security."*

### SIMPLE SET UP & NO TRAINING REQUIRED

Best of all, MailGuard 365 is simple to set up with minimal disruption to clients. Activated with a single-click using your Microsoft credentials, no MX-record change is needed. Plus it works in the native Microsoft 365 environment, so no end-user training is required.
