

# Enhance Microsoft Teams with embedded workflow and project management capabilities

With the monday.com app, you can now manage your team's workflows and projects straight from Microsoft Teams!

monday.com allows you to easily customize code-free work boards, track important deadlines, create automations to eliminate manual work, view dashboards to gain valuable insights, and get a bird's eye view of your team's overall progress for each project - all directly from where your team communicates.

## Streamline your teamwork in one collaborative workspace

### Plug and play

Seamlessly embed the monday.com Work OS and onboard your team quickly and easily within a platform they're already familiar with.

### Empower your team

Streamline all of your projects and processes by keeping your teams in the know with in-context communication and collaboration.

### Make data-driven decisions

Review all of your projects and workflows in multiple views and see all of the relevant data as you communicate in real-time.

Turn chats into action

## Discover the ways the monday.com app allows you to collaborate within Microsoft Team

#1

Manage your monday.com workflows and boards directly from your Teams channels and chats

#2

Stay up-to-date on what's important by receiving notifications from monday.com directly to your Teams account

#3

Create and manage new items for your team straight from within your Teams account

#4

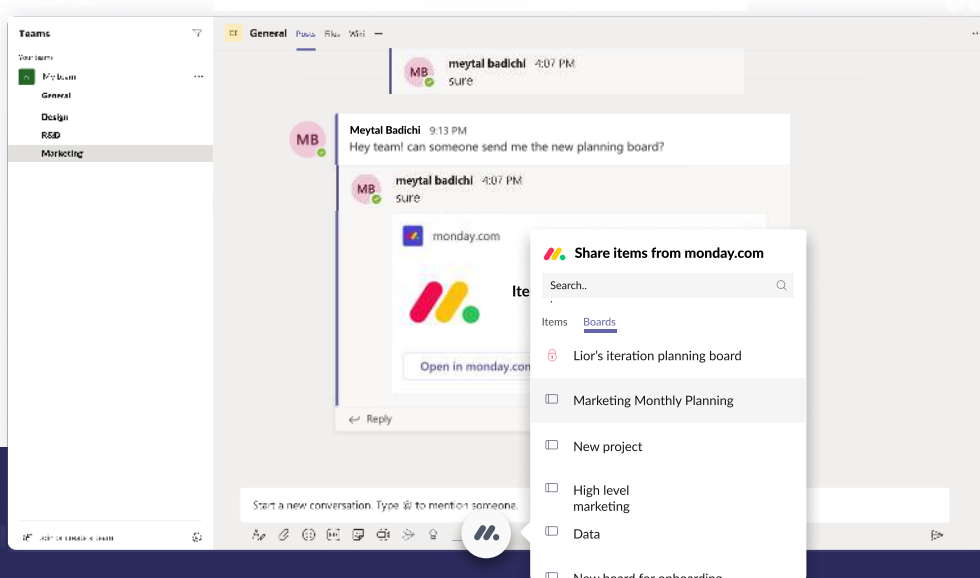

Search for relevant boards and items, and share them in the context of your conversations to keep everyone aligned

#5

Connect your "my week" view to your Teams account, and see what your team needs to accomplish at a single glance

#6

Open up your monday.com boards directly within your Teams video meetings to clearly outline the agenda in advance and collaborate in context while updating conclusions and action items in real-time.

## Connecting your team's communication to their real-time workflows, progress, and productivity
