

Azure Cost Optimization Assessment

FREE 40-point cost optimization inspection

Forward thinking organizations using cloud computing services like Microsoft Azure are constantly looking to improve the return on their cloud investment and reinvest those into projects that drive innovation. In these unpredictable times, the number one question we hear from executives is “How can we immediately optimize our Azure spend and get better control on our costs?”

Hanu’s 40-point inspection is well-designed to save your organization 15-20% on your immediate next Azure bill, at no additional cost. This assessment would help you understand and forecast your bill, optimize workload costs and control your spending. This is the most comprehensive Azure cost optimization assessment available.

Snapshot of the 40-Point Azure Optimization Assessment

Item	Azure Cost Optimization Checklist	Category	Impact
1	RI 1 Year Compute (Reserved Instance)	Compute	HIGH
2	RI 3 Year Compute (Reserved Instance)	Compute	HIGH
3	Deprovision unused VM Instances	Compute	MEDIUM
4	Auto Start & Stop Virtual Machines (Non-Production)	Compute	HIGH
5	Right-Sizing of Virtual Machines	Compute	HIGH
6	Deprovision or down-size underutilized App Service Instances	Compute	MEDIUM
7	Upgrade VMs to New Generation series	Compute	LOW
8	Constrained Instance sizes for database workloads	Compute	MEDIUM
9	Clean up unattached disks and obsolete snapshots	Storage	LOW
10	Optimize Storage runnin Premium & Geo-replication	Storage	MEDIUM
11	Managed Disks RI (Reserved Instances)	Storage	LOW
12	Release Unused Public IPs and NICs	Network	LOW
13	Switch Azure services to low-cost locations and regions	Network	MEDIUM
14	Decommission under utilized and over-provisioned network services - VNET/Application Gateways, VPN/ExpressRoute and Load Balancers	Platform	LOW
15	Identify Azure Paas services created and never or rarely used to either deprovision or optimize by downsizing	Platform	MEDIUM

OUTCOME
15% OR MORE COST SAVINGS ON AZURE

How does it work?

Understand and forecast your costs

Our cloud experts monitor and analyze your Azure bill with Azure Cost Management and Billing. For your next Azure projects, we help estimate the optimum costs and successfully build the business case with key financial and technical guidance.

Cost optimize your workloads

We also review your current workload architecture for cost optimization using the Microsoft Azure Well-Architected Review Framework and follow Azure Advisor best practice recommendations. With our wide understanding of Azure, we help you save with Azure offers and licensing terms.

Control your costs

We help mitigate cloud spending risks by implementing cost management governance best practices at your company using the Microsoft Cloud Adoption Framework for Azure. We help implement cost controls and guardrails for your environment with Azure Policy.

What does it include?

FREE 40-point cost optimization inspection report will be provided that is geared to save your organization 15% or more on your next Azure bill. It includes

- > Detailed savings analysis of every major Azure usage category, including
 - Compute
 - Platform
 - Network
 - Storage
- > Executive cost optimization report with saving recommendations that can be implemented immediately
