

A Modern ERP Solution for Manufacturers with an Experienced Team that Understands the Industry

ABOUT INNOVIA CONSULTING:

Innovia Consulting is an experienced Business Central / NAV implementation and support partner. With over 35 years in business and hundreds of successful ERP projects, we have the resources and expertise to help any business succeed.

WHAT WE OFFER

Expert consultants well-versed in manufacturing processes configure clients' systems according to best practices for efficient, productive operations.

We know the ins and outs of Microsoft Dynamics 365 Business Central, so manufacturers know they are getting the right features and right configurations to meet their goals.

Always-available support and responsive teams keep clients' ERP systems and all their projects on schedule and on budget. We are a Partner You Can Trust, day or night!

By integrating Microsoft solutions like Microsoft 365, Power BI, and more, Innovia customers' ERP systems are more accessible and powerful than ever before.

WHAT OUR CUSTOMERS ARE SAYING

"My life is so much easier. Because I run all the technology for the business from the internet to phone to software solutions, to know I have a team in Innovia that I can call on 24/7 if something comes up that we can't solve ourselves means I can sleep a lot sounder at night."

– Rik Fleming, Director of Technology, OMT-Veyhl

Microsoft Dynamics 365

Transform on your terms with Microsoft Business Applications. Enable people to do their best work. Gain actionable insights. Thrive with solutions expressly built for change. Unlock next.

KEY USE CASES

SALES

Respond to changing business requirements with a flexible platform to rapidly create new solutions and ensure old solutions are never truly finished.

SERVICE

Understand your customers better and respond more quickly by accessing internal and external relationship data.

FINANCE AND OPERATIONS

Increase your return on investment with our agile and efficient Microsoft cloud solution.

TALENT

Extend your virtual team and coordinate faster with a consolidated view of team members, activities, and responsibilities.

MARKETING

Gain end-to-end visibility by connecting data from external markets, social, and legacy sources.

WHY MICROSOFT DYNAMICS 365?

Modern applications that deliver new experiences and connect with businesses' existing systems to allow organization to digitally transform their own way. Applications that use mixed reality, the ability to take an application that overlays on the reality in front of users, that guides them through a business process like never before. Connect to information from social networks, mobile devices and micro-applications to drive intelligence and inform a more effective business process.

Unified data and processes that enables business without silos. Centralized data enables disparate groups to work together effectively via a single, trusted view of processes, relationships, and data. Data connectors allow thousands of systems to bring their data into a single network.

Intelligence that delivers actionable insight. Data in the new world includes social, relationship, and productivity information, in addition to insights generated by business systems. The right solution requires a unified approach that allows companies to automatically leverage their data to decide and act in real time with expanded analytics, predictive algorithms, and automated artificial intelligence.

An extensible environment that enables change. The right solution establishes a data, communication, and application environment that makes it easy to evolve and extend existing business operations, while introducing technologies that enable users to create solutions where no solution exists and to expand data analysis.
