

Azure Cloud App Modernization Consulting

Businesses have adapted cloud due to its benefits like hardware failures during peak seasons, an inability to scale or support ageing hardware, or serious limitations with security, integrations, mobility, and collaboration. But with the daily innovations in the Azure, It is necessary to modernize existing cloud apps to leverage benefits of latest Azure Services which makes a significant impact on performance, cost and other parameters. Microsoft has all the tools you need to enable your digital transformation and Blazeclan can be your one-stop, full-service partner to help you make the most of the intelligent cloud.

Azure Cloud App Modernization Consulting

- Existing Application Assessment
- Selection of the right set of Azure Services stack for Modernization.
- Containerization of existing apps using docker and Azure Kubernetes Service.
- Perform serverless compute with Azure functions
- Application Modernization to Microsoft Azure

Modernization Benefits

- High Performance
- Cost Efficient
- Governance and monitoring
- Security and compliance
- Highly Scalable
- Self healing Infrastructure

Improve agility and time to market

Gain up to 40 – 60% improved agility and time to market.

With Microsoft Azure you can spin up new services and geometrically scale your data storage capabilities on the fly.

Reduce operational costs and TCO

Up to 30% reduction of operational costs and 20 – 40% reduced TCO

By leveraging Microsoft's massive infrastructure and expertise, Azure can trim our annual IT budget by head-turning percentages.

Unlock new revenue opportunities

Up to 20% unlocking of new revenue opportunities

Unlocking the full range of business benefits through an operating-model transformation

Azure App Modernization : Secure, Robust and Highly Scalable

Enterprise-Grade Security

- **Protect Customer & Operational Data:** Azure uses industry-standard protocols to encrypt in transit and stored data.
- **Block Unauthorized Access:** Threat detection limits unwanted traffic.

Robust, Resilient Infrastructure

- **High-Uptime:** Guaranteed 99.9% uptime
- **Dependable Redundant Systems:** Built-in fault tolerance, automatic recovery, and backup and restoration

Reduce operational costs and TCO

- Reduce Total Cost Of Ownership
- Refocus cloud initiatives for Business Capability Enhancement, beyond removing costs

Cloud App Modernization Consulting

Our promise to you

With years of expertise as a renowned cloud service provider, Blazeclan delivers easy-to-adopt and time-effective modernization solutions to a broad spectrum of customers. We combine practical experience with technology & business strategy to help you embark on a smooth cloud migration journey.

An offer to get you started

- Strategy and Assessment
- Cloud Modernization
- Governance

Value to Optimize and Modernize

Agility	Time to market	TCO	IT simplification
Continuous delivery Containers	Scalability and HA Insights and Analytics	Infrastructure Cost Ongoing Maintenance	Standardization Simplification

Tangible Benefits / Desired Outcomes

- Real time project reporting with full visibility of progress at each stage of the process
- Discovery Report (Assessment Category - Standard or Custom, Complexity, Right-Sizing)
- Assessment plan (Starting Date & Estimated Completion Date)
- Road-map for Azure modernization and Business impact
- Modernization Plan (Pre-& Post Modernization Phase)
- User Acceptance Testing (UAT) Instructions Post Modernization support - mitigate risk with 2 weeks post Modernization support (24x7)
- Project Closure

Why Blazeclan?

Blazeclan is a Microsoft Azure Gold Partner to provide industry oriented strategic solutions to customers. With extensive experience in cloud migration and deployment, Blazeclan ensures that the solution offered to a customer is the best in the industry.
