REAL VALUE

The Omnichannel Document Warehouse fully integrated in your business processes

Raptor provides a **scalable solution** for all your unstructured information, ranging from physical paper flows to full electronic communication.

It is a **ready to benefit hub** that retrieves information from all **internal or external sources**, **structurizes** this and at all times **presents** the **correct & relevant information** in an **integrated** and **uniform** way, no matter the business application, process or profile of the employee.

Built as a **SaaS** solution upon Microsoft's **Azure** platform it's always using the latest technology available, making sure you have a **future-proof** solution that constantly evolves without you having to worry about infrastructure, versions or upgrades.
