

☒ CLOUD TRANSFORMATION

Withum's full spectrum of cloud services can support your business throughout your journey to the cloud and long after. We focus on three core areas to ensure your transformation helps you maximize the benefits of the Microsoft cloud, enabling efficiency, productivity and security.

ON-PREMISES TO THE CLOUD

COMMUNICATION

- Gmail
- On-Prem to Cloud

COLLABORATION

- File Share to Sharepoint, Onedrive, Microsoft Teams
- File Shares to Azure
- Sharepoint On-Prem to Sharepoint Online

DATA

- Normalization
- Azure
- Centralizing

The first step in the maturity model is to remove focus on “keeping the lights on” and turn towards increasing organizational output. Through analysis and planning we develop a migration plan to move your hardware, software, data and processes to the cloud.

withum⁺

AUTOMATE

PROCESSES

- Onboarding
- Desk Sharing

INTEGRATED COMMUNICATIONS

- Teams Calling

REAL-TIME REPORTING

- PowerBi

Moving from infrastructure to business value, Microsoft 365 provides many opportunities to streamline repetitive processes, remove distraction when communicating and provide constant feedback on how your business is doing.

SECURE

INDIVIDUALS

- Dual Factor Authantication
- Adoption/Change Management

CONTENT

- External Sharing Policies
- Information Protection

DEVICES

- Endpoint Management

While important at every step of the journey, the most value gained from security is found after your organization is using Microsoft 365 to the fullest. Balanced with your Microsoft 365 License investment, we deploy the latest technology to support, not impede, your employees' productivity.
