

What is e-factura® SaaS?

The e-factura® SaaS system, is a web solution, a robust and reliable system for the generation of electronic invoices by Internet (CFDI).

The system is especially designed for SMEs (Small and Medium Enterprise), as well as global companies who require integration requirements to any ERP and avoid expensive integration fees.

It is a system designed for easy of use. Any company may adopt the solution, in minutes, provided that they have an electronic signature and a Digital certificate, both, issued free of cost by SAT.

The e-invoice SaaS system has an electronic stamping platform authorized by SAT via 3 (three) different Authorized Certification Provider (PAC). This unique architecture, allows for high reliability and cost efficiencies that customers do appreciate.

The e-invoice SaaS system will help companies to comply with the mandatory electronic invoicing regulations in an easy, reliable and inexpensive way.

The system also offers the capability to create individual electronic mailboxes where customers and/or issuers of e-invoices will keep a copy of all CFDI independently of the systems where those invoices were created. This additional service is provided FREE OF CHARGE. Invoices can be queried, downloaded for printing, e-mail submission, etc.

The e-factura SaaS solution is backed up with a comprehensive support help desk service, that will alleviate any difficulties that may be experienced with the use of the system.

Time to migrate your e-invoicing process to a best-in-class, web system, that use Microsoft technology as the foundation of its architecture.
