

Flow Studio

Flow Studio is an application that connects to your Microsoft Flow and extends that experience

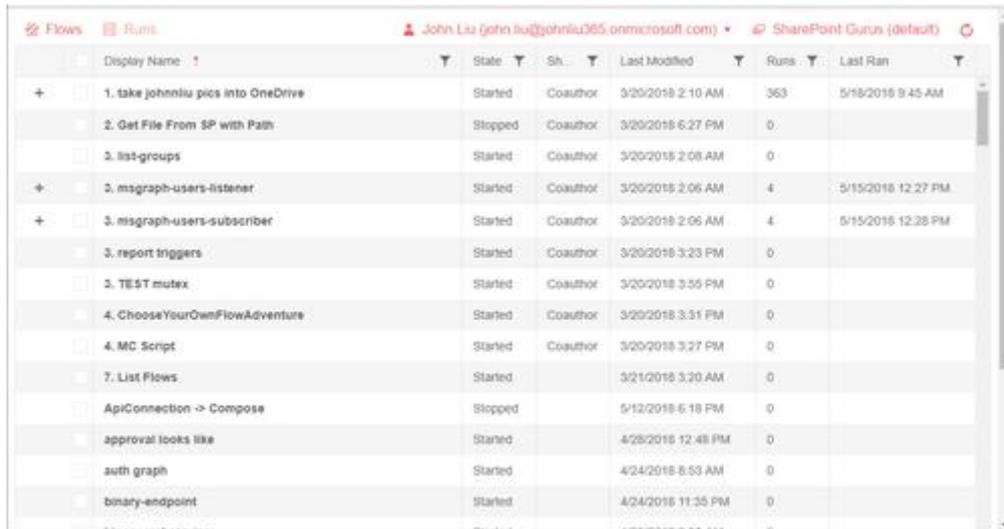

It is not a replacement of the Microsoft Flow site or app
It is designed to add additional features that will assist both Makers and Admins in using Microsoft Flow

<https://FlowStudio.app>

<https://flow-studio.azurewebsites.net>

See the latest update <http://johnliu.net/blog/2018/8/the-future-of-flow-studio-trial>

Flow Studio Free

Display Name	State	Sh...	Last Modified	Runs	Last Run
1. take johnliu pics into OneDrive	Started	Coauthor	3/20/2018 2:10 AM	363	5/18/2018 9:45 AM
2. Get File From SP with Path	Stopped	Coauthor	3/20/2018 6:27 PM	0

4. MC Script	Started	Coauthor	3/20/2018 3:27 PM	0	
7. List Flows	Started		3/21/2018 3:20 AM	0	
ApiConnection -> Compose	Stopped		5/12/2018 6:18 PM	0	
approval looks like	Started		4/28/2018 12:48 PM	0	
auth graph	Started		4/24/2018 8:53 AM	0	
binary-endpoint	Started		4/24/2018 11:35 PM	0	

Additional Navigation, Visibility

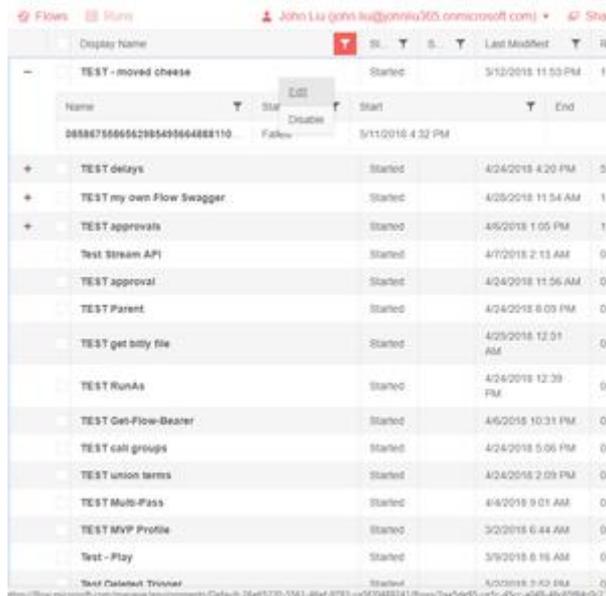

Flow Studio help a Maker navigate their Flows

- allowing sort, filter in many fields.
- Sorting includes by Last Run, or by Run Count. These improves a maker's awareness of what's running in their Flow environment.
- Jumping into that Flow or that Flow Run takes a maker right into their Flow.
- Custom Tags for filtering
- Trigger connector for filtering
- Colour filtering

Some future updates ideas:

- action connectors for filtering
- saved 'views' for custom filters and sort

Flow Studio Pro

The screenshot displays the Flow Studio Pro interface. At the top, there are tabs for 'Flows' and 'Runs'. The user's name 'John Liu (john.liu@onmicrosoft.com)' is visible in the top right. Below the tabs is a table listing various flows. The table has columns for 'Display Name', 'Status', 'Last Modified', and 'ID'. A 'TEST - moved cheese' flow is highlighted, and a context menu is open over it, showing options like 'Edit', 'Star', 'Disable', and 'Follow'. Below the table, there are several expandable sections for different flows, each with a '+' icon and a 'Started' status.

Display Name	Status	Last Modified	ID
TEST - moved cheese	Started	3/12/2018 11:53 PM	1
TEST delays	Started	4/24/2018 4:20 PM	5
TEST my own Flow Swagger	Started	4/28/2018 11:54 AM	1
TEST approvals	Started	4/5/2018 1:05 PM	1
Test Stream API	Started	4/7/2018 2:13 AM	0
TEST approval	Started	4/24/2018 11:56 AM	0
TEST Parent	Started	4/24/2018 8:09 PM	0
TEST get body file	Started	4/29/2018 12:01 AM	0
TEST RunAs	Started	4/24/2018 12:39 PM	0
TEST Get-Flow-Bearer	Started	4/5/2018 10:31 PM	0
TEST call groups	Started	4/24/2018 5:06 PM	0
TEST union terms	Started	4/24/2018 2:09 PM	0
TEST Multi-Pass	Started	4/4/2018 9:01 AM	0
TEST MVP Profile	Started	3/22/2018 6:44 AM	0
Test - Play	Started	3/9/2018 8:16 AM	0
Test Calendar Trigger	Started	4/20/2018 5:42 PM	0

Flow Studio Pro: Additional Power, Convenience for Makers

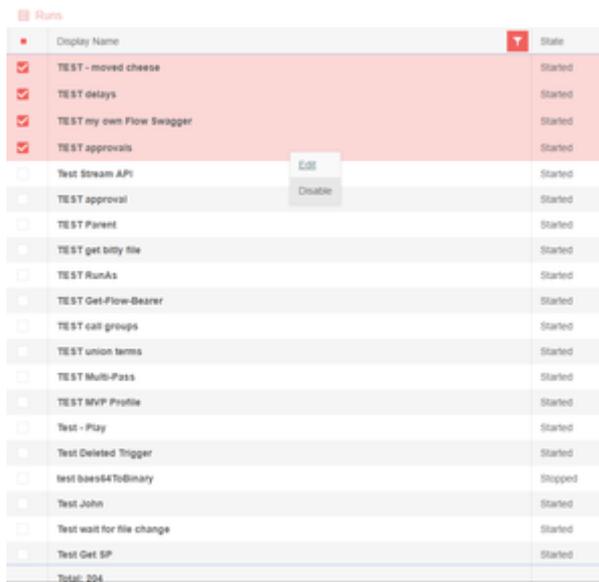

Flow Studio can:

- Duplicate Flow
- Edit JSON support with Find/Replace
- Multi-select and resubmit failed runs
- Export almost everything to Excel

Some future updates ideas:

- features to insert snippets
- combine existing Flows
- simple backup to allow you to undo and rollback to an earlier version
- alerts when it detects a mistake in a common pattern

Flow Studio Admin

Display Name	State
TEST - moved cheese	Started
TEST delays	Started
TEST my own Flow Swagger	Started
TEST approvals	Started
Test Stream API	Started
TEST approval	Started
TEST Parent	Started
TEST get bitly file	Started
TEST RunAs	Started
TEST Get-Flow-Bearer	Started
TEST call groups	Started
TEST union terms	Started
TEST Multi-Pass	Started
TEST MVP Profile	Started
Test - Play	Started
Test Deleted Trigger	Started
test bees64ToBinary	Stopped
Test John	Started
Test wait for file change	Started
Test Get SP	Started
Total: 204	

Flow Studio Admin: Additional Bird's Eye View, Ease of Mind for Admins

Flow Studio Admin can:

- visibility into all Flows running inside a tenant's environments

Some future updates ideas:

- focus on Runs - view environment by aggregated runs
- export of run details, including available output steps
- additional triggers when Flow Studio detects there are new Flows or new Failed Runs - so you can decide what to do
- turn off Flows that exceeds a quota
- report on Connectors used by a Flow
- manage Flows by deactivating them as a group, or moving them between environments
- report on orphaned Flows whose owner may have left the company

Sign up and Feedback

This tool is in open trial status. We look forward to your feedback.

Try it:

<https://FlowStudio.app>

<https://flow-studio.azurewebsites.net>

Feedback is welcomed - can be done here, or within the app

<https://github.com/johnnliu/Flow-Studio-Issues/issues>

We also have a Survey you can fill out but this is easier after you have some experience with Flow Studio

Privacy / GDPR Disclaimer

The Flow Studio Team (John Liu) will only share **Personal data** and **Personal Sensitive data** between Client and Team with the written consent from both parties. There are no third parties involved, and if there were in the future - written consent will be requested first.

No data will be shared with other organisations the Flow Studio team is associated with: SharePoint Gurus, Sydney SharePoint Usergroups, or Office 365 Saturday Australia.

Without this written consent, no personal data will be shared with any persons or organisations in or outside of The Flow Studio Team.

All transfer of data within or between The Flow Studio Team and its Customers is protected by HTTPS encryption.

Specifically, **Flow Studio currently records a user's Email address for login and verifying valid accounts**. In the future we may look at implementing a subscription service or automated remote monitoring services - we will send communication before moving users into any subscriptions offering.

Requests for account to be deleted is available by contacting compliance officer (John Liu)
