Challenges Faced While Moving To Cloud

Identifying Components to be Moved Into The Cloud ?

What is Best Suited Cloud for Us ?

Will our Existing Software Work with the Cloud?

Will My Data be Secure on Cloud ?

Would I Adhere to Regulatory Compliances ?

How would by Staff and Client Access Cloud Infrastructure Easily and Securely ?

Will Cloud Hosting be Cost Effective ?

Would I Get Required SLA ?

360 Degree Cloud IBN Services

CloudIBN Technology Team

Bare Metal Servers

CTO/ CIO

- Cloud Service & Product Road Map
- Product Partnerships
- Review of Service SLA's

Pre Sales/
Architect

- Requirement gathering, proposing and architecting best solution

Other Services

Partial Case Studies

Client from Health Care Industry

- Client is one of the Major health care provider from USA having patient billing application hosted on Traditional data center.
- He wanted CloudIBN to manage & propose Secured , Compliant And Highly Available Cloud .

Solution Overview

- Proposed Major Azure Components - Load Balancer , Traffic Manager , Virtual Machine in Availability sets , App Gateway , Key Vault
- Performed VAPT Test and jointly performed security changes as per report
- Provided DLP solution
- Separated Production and Dev Test Environment .. Moved on premise Source Control to Cloud

Benefits Observed From Solution

- Faster User transaction and Better Experience with Load balancing
- Higher resiliency with HA and backup DR
- Dynamic scalability of applications based on increase in end user concurrency
- Complied to all Guide lines as per HIPAA

Partial Case Studies

Client is NBFC

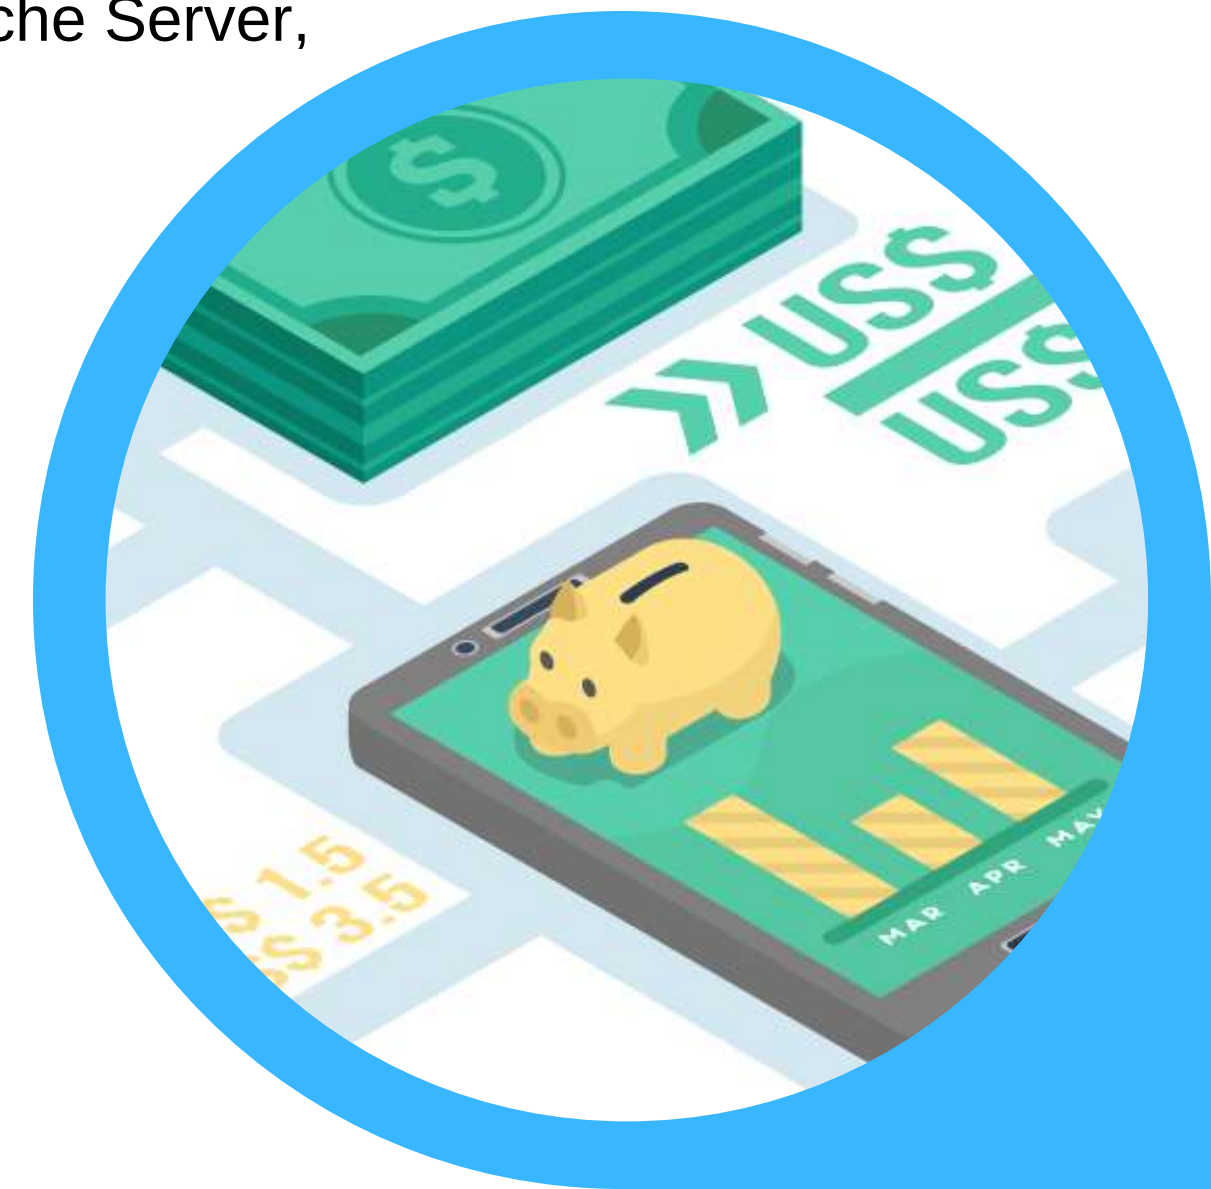

Client is one of the NBFC provider from India hosted on Traditional data center without DR. He wanted CloudIBN to manage & propose Secured , RBI Compliant And Highly Available Cloud .

Solution Overview

- Proposed Major Azure Components - Load Balancer , Traffic Manager , Virtual Machine in Availability sets , App Gateway , Key Vault , Active Directory, Site to Site VPN, Cache Server, My SQL Multi Node Cluster, MFA
- Performed VAPT Test and jointly performed security changes as per report
- Implemented SIEM Solution for Quick incident reporting

Benefits Observed From Solution

- Faster User transaction and Better Experience with Load balancing
- Higher resiliency with HA and backup DR
- Dynamic scalability of applications based on increase in end user concurrency
- Complied to RBI Guide
- Quick incident reporting
- Access Based Control
