

Atlas Digital Workspace

Brief Overview

Connecting People
to Knowledge

The digital transformation wave
is leaving gaps, issues and
confusion in its wake

Challenges

organisation

01

Low productivity & engagement

Improving employee engagement and productivity is hard, and even harder when working remotely

02

Low adoption

Organisations are unable to realise their investment in Microsoft 365 and unleash its full potential

03

Sprawl of data

Knowledge sharing is more difficult as we introduce new data silos and create end-user confusion

01

I can't find stuff

Employees can spend 1.8 hours searching and gathering information per day - *McKinsey*

02

Too many app

The average person has 60-90 apps. 69% of workers waste up to an hour per day navigating between apps - *RingCentral*

03

Too many silos

Inefficient communication and substandard collaboration costs £8k/person p.a. (*Raconteur*)
Only 2% of businesses feel they are effective at data sharing (*customerTHINK*)

end users

Atlas is the place to get work done

Atlas Collaboration

Bringing people together to do their best work through integration and smart tools

Atlas Knowledge

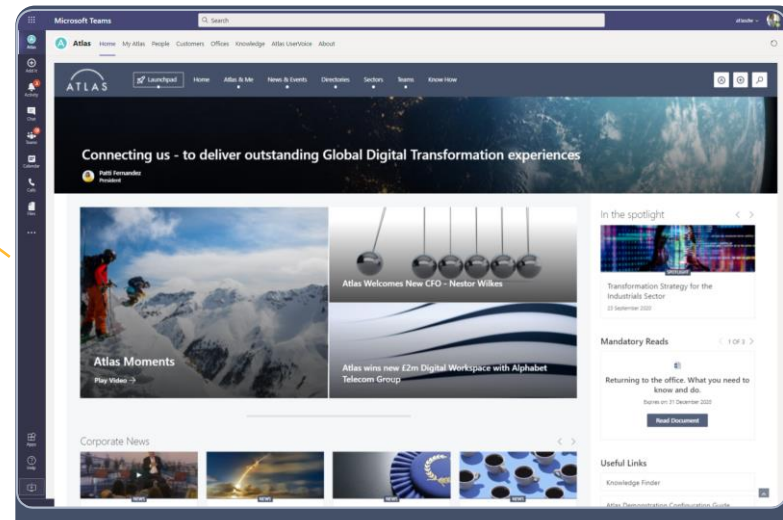

Atlas empowers users with answers by making the contribution, findability and sharing of knowledge intuitive

Atlas Connect

Users can create the sites, teams and groups they need, backed by a powerful governance framework

Atlas Communications Intranet

Atlas enhances communication with personalisation, targeted content and user engagement

Atlas AI / Smart Tools

A collection of advanced tools that make work more effective and productive

Benefits

01

Increase Profits and Returns

Atlas lets you sell more, do more and achieve more by getting the most out of Microsoft 365

02

Prevent Knowledge Drain

The impact of losing knowledge is great. We make it easy for everyone to contribute, share and find knowledge

Reduce Risk

Atlas Connect is a game changer for IT and business users by making governance and compliance simpler

03

Increase Productivity

Our clever tools truly save time so employees can focus on the tasks that matter

04

High level features

Productivity

- Automatic and suggested tagging
- Best practice classification saves time and effort
- Classify unstructured data so that it becomes knowledge
- Information you need in the context of where you are
- Governance tools for consistency

Findability

- Best-in-class search experience
- Filters to make finding stuff quicker
- Find experts quickly and interact with them easily
- Central and up-to-date employee directory
- Central customer and project directories

Usability

- Work and find information across many apps and Teams
- All-in-one solution to unify data management
- Replace legacy application experiences
- Consolidate integration with 3rd party tools/data
- Support a more collaborative company culture
