YOU'RE READY TO MOVE TO THE CLOUD, BUT ARE YOU BUSINESS APPLICATIONS READY?

Cloud application hosting on managed, enterprise-grade equipment in hardened, secure, and compliant data centers with high-speed connections for your access. The management, administration, and maintenance of the infrastructure are included. With custom-tailored services, security, access, data protection, disaster recovery, and Active Directory integration.

Benefits

Simple to Use

Every month your service can be updated to match your actual needs. None of the headaches or costs associated with owning your servers or any of the extra supporting hardware you're supposed to have. And your application and your data are always yours.

Free Up Cash

Put an end to large, periodic capital expenses to keep your network up to date. And the unexpected capital expenses to keep it running. Reduce your IT workload, complexity and skillsets required. Stop pre-paying for headroom, unused capacity, and expansion capabilities.

Mobile and Resilient

Secure access - Anywhere, anytime, or any device! Easily switch between devices and locations. Deliver applications to your people instead of the other way around.

THE IDEAL SOLUTION FOR ANY APPLICATION THAT IS CRITICAL TO YOUR BUSINESS!

Houston - New York - Dallas - Nashville - Fargo - Ft. Lauderdale - Des Moines - Greenville
