Own{backup}

Eliminate Data Downtime

Whether you've got 1 user or 1 million, OwnBackup proactively prevents you from losing access to mission critical data

- Human Error
- Bad Code
- Integration Error
- Migration Error
- Malicious Intent

#1 Cloud Data Protection Platform for Salesforce

salesforce appexchange ★★★★★

Reduce your risk of loss, enhance your options

As we continue to improve our cloud supported infrastructure, we noted a gap in the ability to restore our systems in the most critical loss scenarios.

Our sales rep, Gabriela Paulino, and our support agent, Randy, delivered what was promised, and more!

Douglas Boughton
Chief Financial Officer

The obvious choice for Salesforce disaster recovery

I have had exposure to OwnBackup with three different companies using Salesforce. All three instances have been great.

Femi Oye
Salesforce Certified Administrator

Must have for peace of mind!

I can't say enough about the reassurance that stems from and usefulness of OwnBackup. Data recovery options from Salesforce are cumbersome, expensive, not granular enough, and represent nightmare csv restore scenarios. OwnBackup solves all of those problems for me. I know that I always have up to date data restore available for every scenario from mass database corruption, to minor user update errors with ease.

Tory Netherton
Chief Financial Officer

Over 2,000 Customers Across
# Every Industry & Company Size

The Cloud is Not a Fortress

People assume that if it's in the cloud, it's protected. But for most SaaS apps like Salesforce there is a shared responsibility for keeping data safe. Customers are responsible for the errors and corruption they create. Yet despite this exposure, most organizations don't backup their SaaS data or have the ability to easily recover.

> **"Yes, we recommend you use a partner backup solution.**
> There are more comprehensive, automated solutions for
> backup of data and metadata on the AppExchange."

Eliminate Data Downtime

Move faster with the confidence you can restore vital business information quickly and completely.
