

# Take the fast track with a worry-free cloud migration to Dynamics 365 Business Central

## Multi-Entity Management migration service

### Scope

Estimated service is for migration services listed for 1 tenant only. Any additional implementation services and consulting will be charged on a time materials basis. Any additional data migration will be billed based on time and materials

Estimates may vary based on the scope and requirements gathering. These will be communicated through a standardized change management process.

The following key Dynamics GP modules are not supported:

- Fixed assets
- US & Canadian payroll
- Project accounting

*The Dynamics GP database must be less than 80GB. Estimates are for each D365 BC destination company. Does not include MEM consolidation services.*

### Duration

Typical implementation is approximately 5-10 days, but not to exceed 2 months from start of trial migration.

### Location

This service is provided virtually through web-based meetings and remote access

### Description of services

The migration utility software is licensed to each end user account at no charge.

Services will be provided on a time and materials basis and will include the following for each D365 BC company destination company being migrated:

- Project plan and scope – 2 hours
- Trial Migration – 4 hours
- MEM pre-requisite validation and checks
- Utility configuration and object mapping
- MEM post migration validation checks
- MEM for BC product training – 4 hours
- Testing support – 2 hours
- Advisory services for process improvements including configuration, and adoption of new processes – 4 hours
- Live migration – 4 hours
- Go-live support - 4 hours

### Total estimated hours – 24 hours

*The hours listed above are an estimate based on best practices for a typical client. Additional hours will be billed on a time and materials basis after approval of a change order*

*Professional services time will be invoiced monthly based on the actual hours used.*

# Why Dynamics 365?

## Modern applications

Modern applications that deliver new experiences and connect with a business' existing systems to allow organizations to digitally transform their way. Applications that use mixed reality, the ability to take an application that overlays on the reality in front of the user, that guides them through a business process like never before. Connect to information from social networks, mobile devices, and micro-applications to drive intelligence and inform a more effective business process.

## Unified data and processes

Unified data and processes that enable business without silos. Centralized data enables disparate groups to work together effectively with a single, trusted view of processes, relationships, and data. Data connectors allow thousands of systems to bring their data to a single network.

## Intelligence that delivers

Intelligence that delivers actionable insight. Data in the new world includes social, relationship, and productivity information in addition to insights generated by business systems. The right solution requires a unified approach that allows companies to automatically leverage their data to decide and act in real-time with expanded analytics, predictive algorithms, and automated AI.

## An extensible environment

An extensible environment that enables change. The right solution establishes a data, communication, and application environment that makes it easy to evolve and extend existing business operations, while introducing technologies that enable users to create solutions where no solution exists and to expand data analysis.

Transform on your terms with Microsoft Business Applications, enable people to do their best work, gain actionable insights, and thrive with solutions expressly built for change.
