ORDERBASE MEGABOARD

The important things come first

The **orderbase MegaBoard** helps you with this major target in the process of manufacturing-, service- and project planning. Quick decisions need fast and transparent data preparation.

The orderbase MegaBoard shows a graphical depiction of capacities, loads and lapse of orders. The orderbase MegaBoard was developed, designed and optimized especially for the use of mass data from production structures in order to enable a highly efficient planning. The easy depiction of the actual loads and the intuitive handling provide the planner with a transparent basis for decision-making. This way you can concentrate on the important things in the daily business. Manual and automated planning functions help to avoid planning errors and reveal alternative planning scenarios.

HIGHLIGHTS

- **Planning via drag & drop**
- **Bottleneck planning**
- **Workload depiction**
- **Capacity planning**
- **Sequence planning**
- **Critical path analysis**
- **Material availability check**
- **Limited capacity**
- **Rough/Detailed planning**
- **Sophisticated heuristic**
- **Weighting priorities**
