

Login Apps & Desktops

Business enabled virtual apps and desktops running on Microsoft Azure Virtual Desktop

Business enabled virtual apps and desktops that are directly consumable within your organization by using the benefits of the cloud (scalable and flexible, secure by design, pay per use and available worldwide).

What is Login Apps & Desktops?

Login Apps & Desktops is a fully-fledged virtual Windows workspace running on Microsoft Azure Virtual Desktop (AVD), that delivers virtual apps and desktops in Azure accessible from any location and any device. For specific use cases, extra graphics capacity can be provided to complete the workspace.

Why customers use Login Apps & Desktops

At-a-glance

- Business enabled managed workspace for apps and desktops running in Azure
- Remote application launcher for Win32 business applications, to complete the Modern Workplace
- When needed AVD can be enriched with Citrix or VMware features running in Azure

Business Enabled virtual apps & desktops

- Cloud-based desktops and applications
- Directly consumable within your organization
